# Animals on the Move

Many animals move by running.

Others fly to go from place to place.

Many animals jump!

An animal might jump towards something it wants to eat.

Or, it may jump away from something that wants to eat it.

grasshopper

# Grasshopper

A grasshopper has legs like tiny springs. It uses them to push off.

A grasshopper may jump to find food. It may jump to escape an enemy.

A grasshopper can leap from one blade of grass to another.

## Red Fox

A red fox jumps to catch its prey.  
It can leap straight up.  
Then it dives head first into the snow.  
It can catch mice hiding underneath.

For Review Only

A red fox can leap into the snow to catch its prey.
