Where Birds Make Their Nests

Nests are places where birds lay their eggs.
Birds look after their babies in nests.

Birds make nests in trees,
on the ground or in **burrows**.

They lay their eggs on **cliffs**,
in buildings or in bird boxes.

Nests can be found in lots of places!

Nests in Trees

Lots of birds make their nests in trees.

They build their nests from things
they find around the trees.

These birds make a home in the treetops.
They are safe above the ground,
where other animals cannot find them.

Nests on the Ground

Birds can make their nests
in lots of places on the ground.

There are birds that build nests in the grass.

There are others that hide their nests
under plants or small trees.

For Review Only

Some birds lay eggs in little holes they make in the ground.

Other birds lay eggs on top of rocks.
