The Sky by Day

In daytime, the Sun is out.
It lights up the sky.

We cannot always see the Sun.
Where does it go at night?

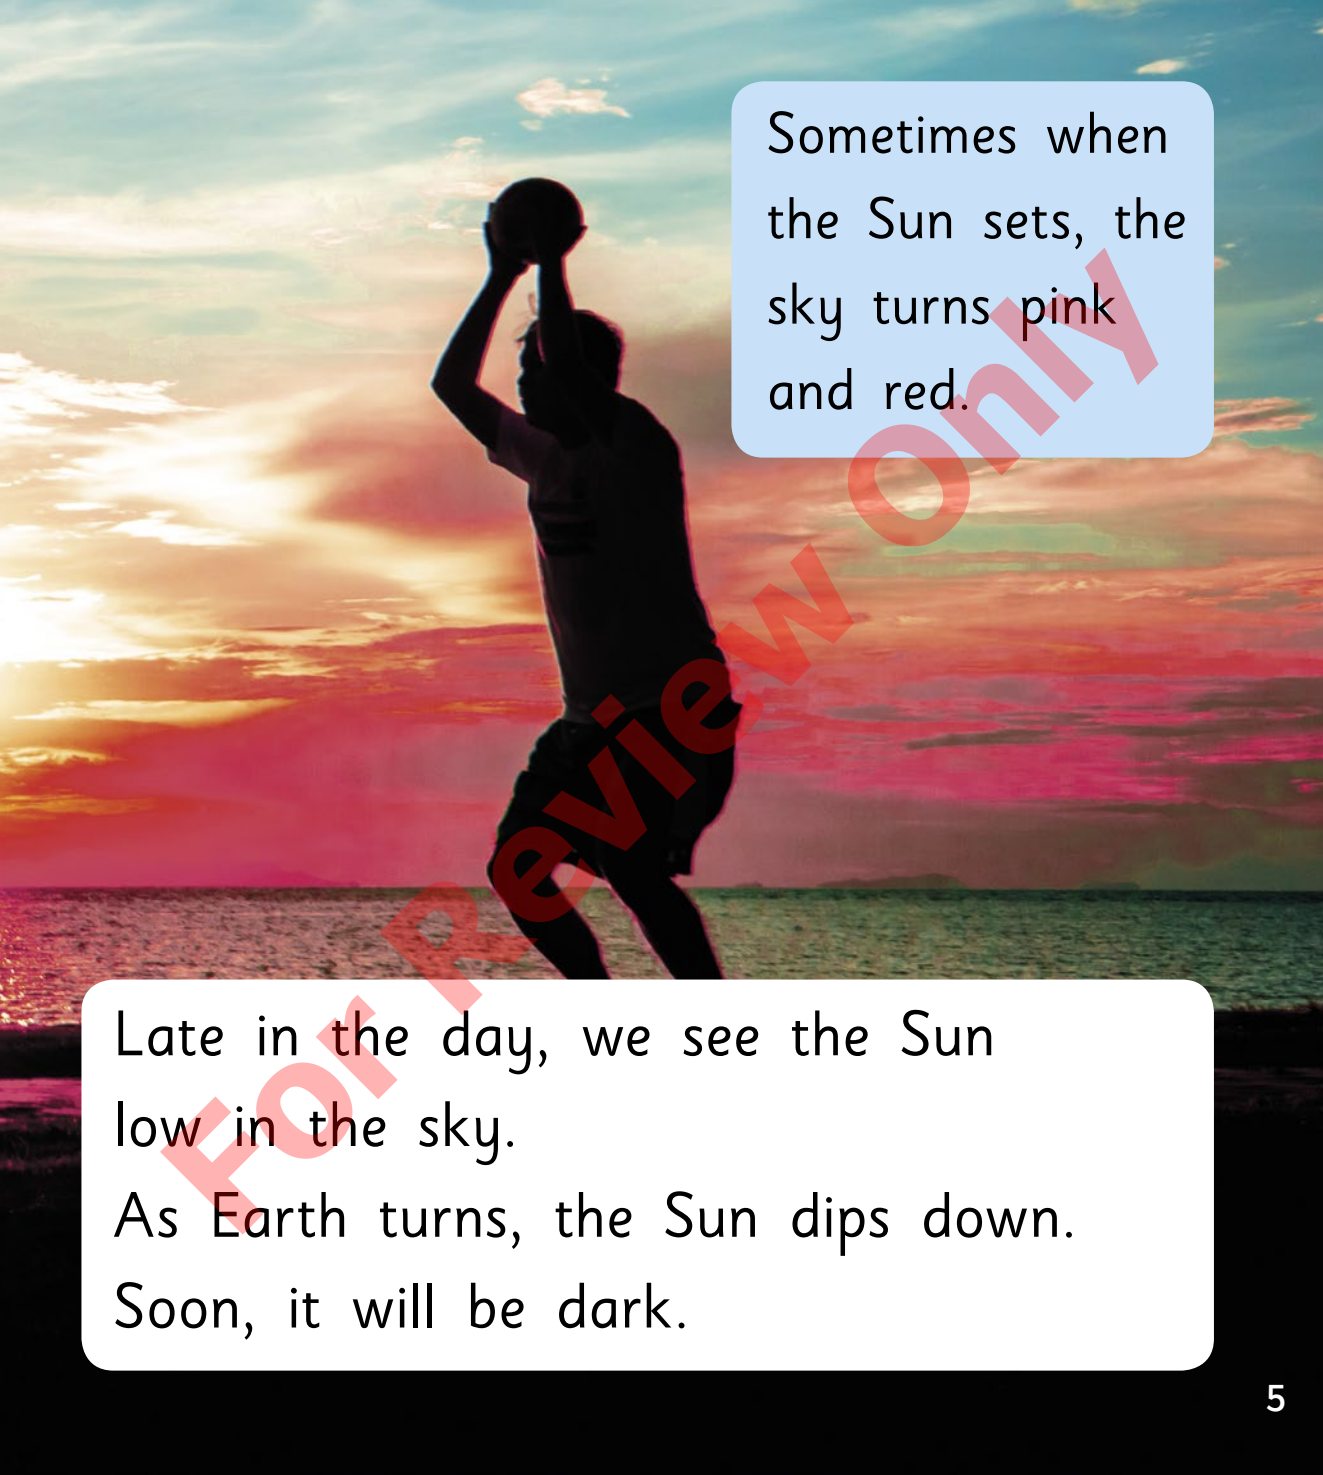

For Review Only

The Evening Sky

Each day, Earth turns.
As it turns, the Sun shines
on different parts of Earth.

For Review Only

Sometimes when the Sun sets, the sky turns pink and red.

Late in the day, we see the Sun low in the sky.
As Earth turns, the Sun dips down.
Soon, it will be dark.
