Nature's Playground

The Great Barrier Reef is big. It is beautiful. It is very old. And it is alive!

Let's Do Math!

Imagine you see 16 clown fish at the Great Barrier Reef. Draw or place objects on ten frames to answer the questions.

1. Are there enough clown fish to make a ten?

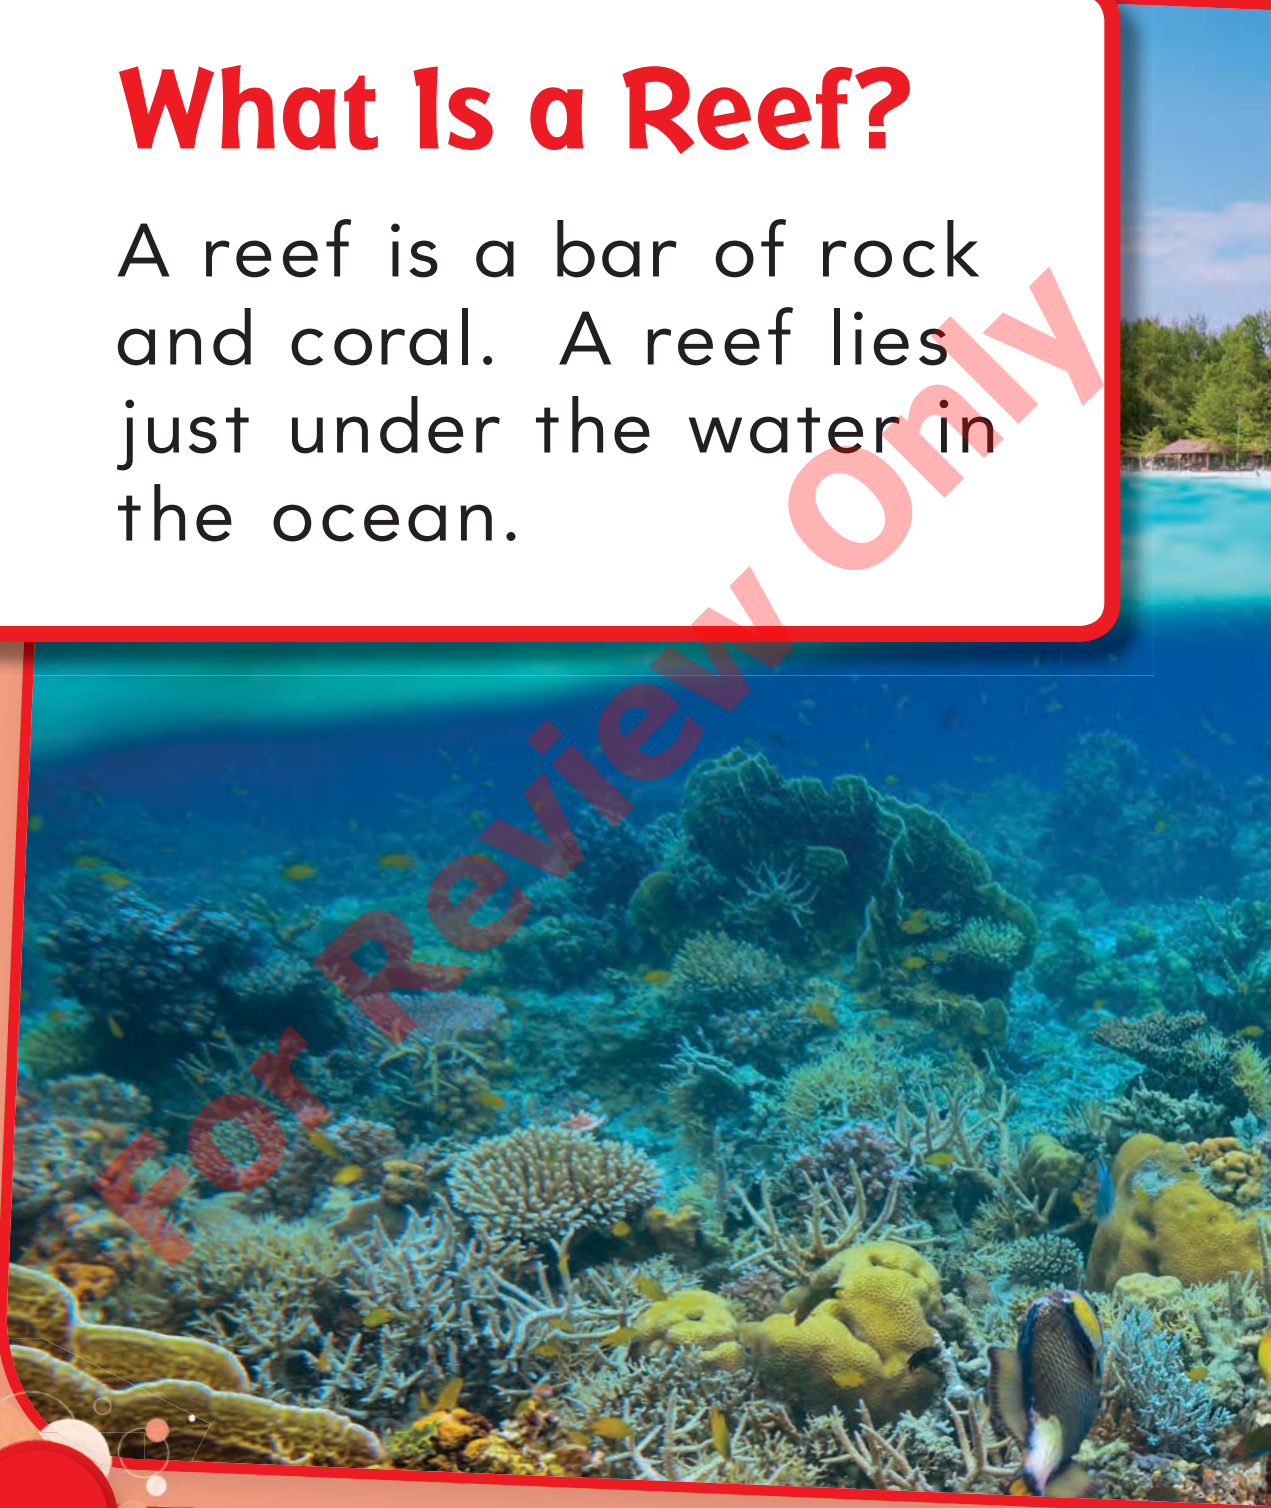

2. Are there any leftover clown fish after you make a ten? If so, how many?

What Is a Reef?

A reef is a bar of rock and coral. A reef lies just under the water in the ocean.

Math Talk

1. What do the symbols >, <, and = mean?

2. What is a number that will have no leftovers after making tens?

3. How are the numbers 15 and 51 alike? How are they different?

4. Lena says that 23 has 2 tens and 3 ones. Peter says 23 has 1 ten and 13 ones. Who is right? Why do you think so?
