Little Sneaks

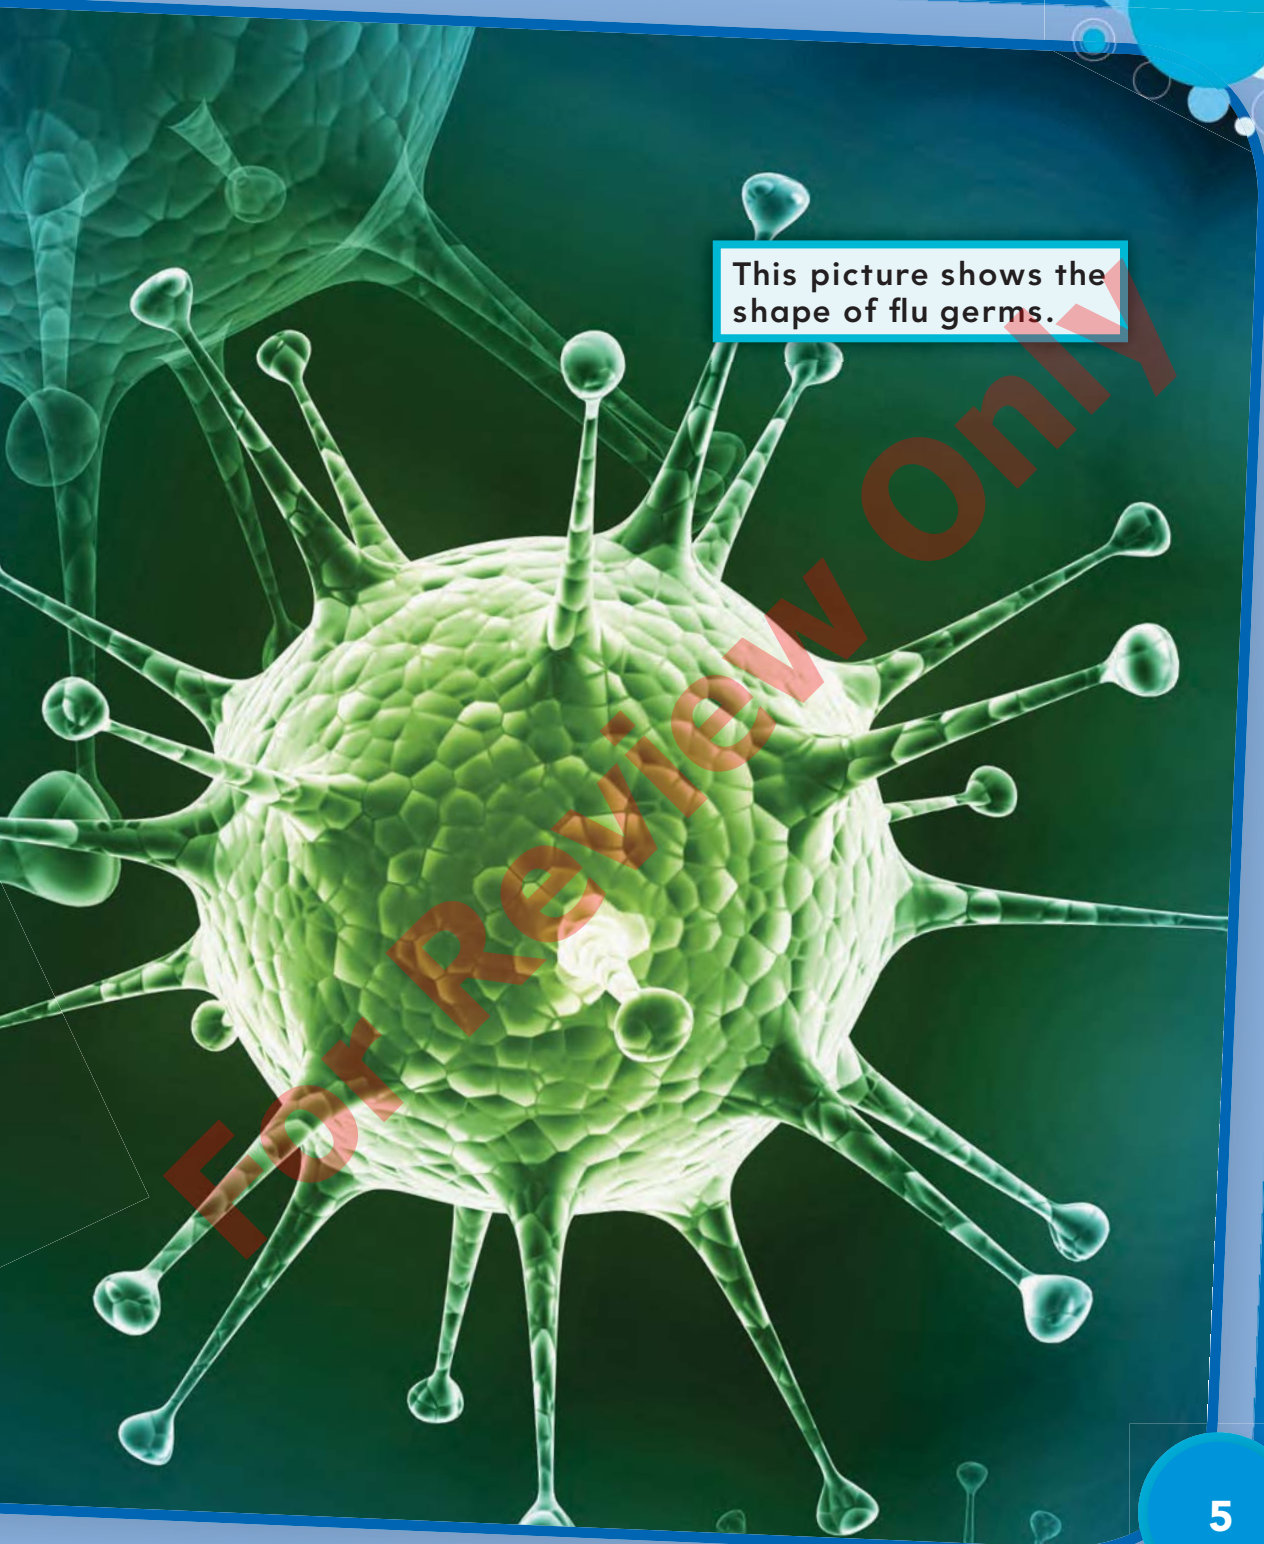

They are all around! They are on you. They are inside you, too.

What are they? Germs!

Germs are too small to see with your eyes.

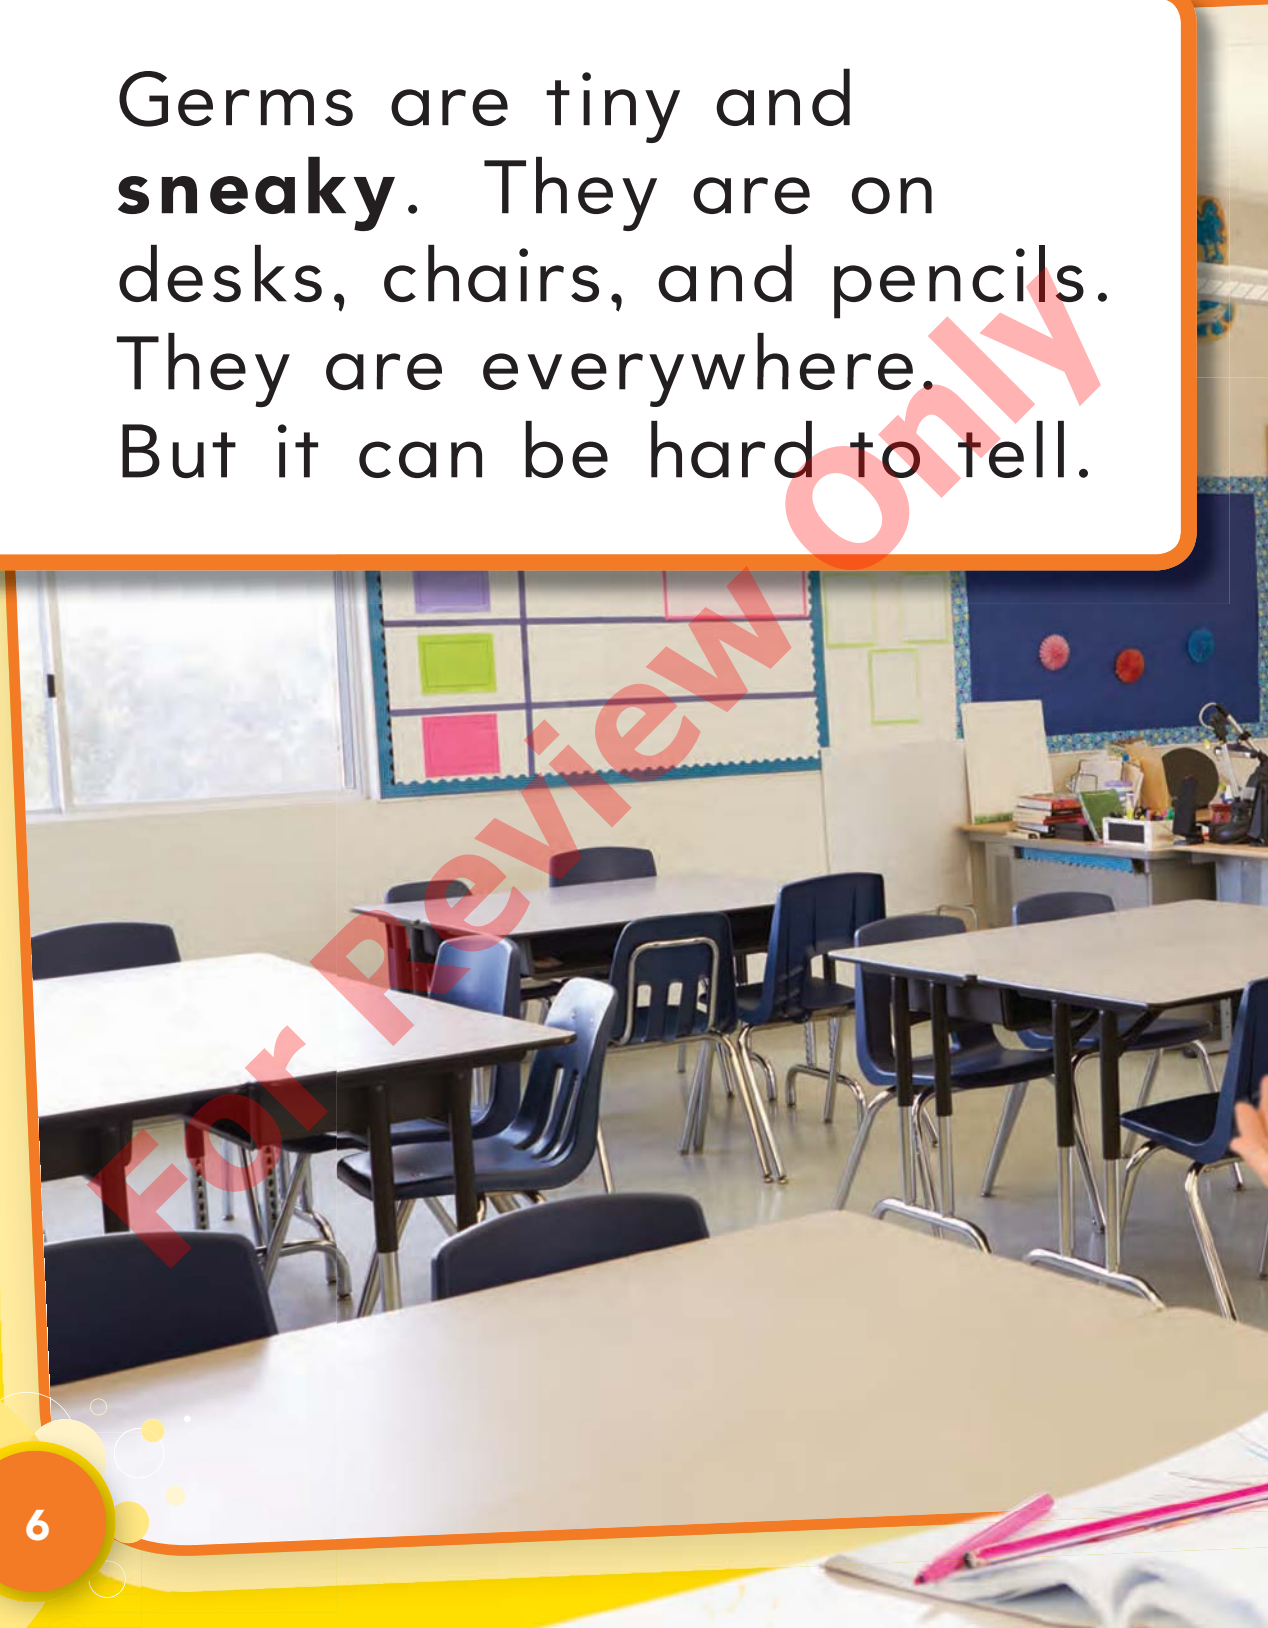

For Review Only

This picture shows the shape of flu germs.

For Review only

Germs are tiny and **sneaky**. They are on desks, chairs, and pencils. They are everywhere. But it can be hard to tell.

What Germs Do

You cannot see germs because they are too small. You need a **microscope**. You might use this tool when you learn about germs.

Let's Do Math!

Mr. Lee teaches science. He has 16 microscopes. He buys 10 more. How many microscopes does he have now? Solve with a number line.

Math Talk

1. What patterns do you see on a hundreds chart when adding and subtracting 10?

2. How do you choose whether to add or subtract when solving a word problem?

3. What strategies can you use to mentally add and subtract 10?

4. Lila writes:

   30 – 10 = 2 tens

   Do you agree with her solution? Why or why not?
