My Foot Fell Asleep

My foot fell asleep
right inside of my shoe
from sitting around
having nothing to do.

It hadn't drank warm milk
nor tried to count sheep;
it just wasn't busy,
and fell right asleep.

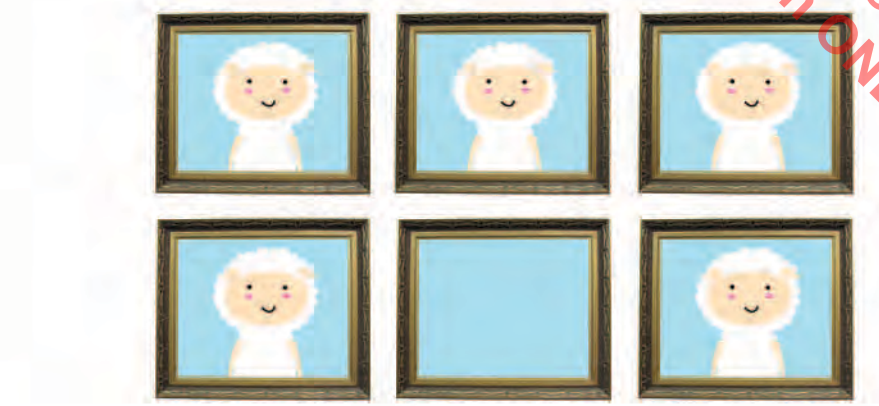

You see, in my shoe
it gets lonely and boring,
which made my foot sleepy,
and soon it was snoring.

My foot snored so loudly
my shoe began flapping.
But it didn't notice—
it kept right on napping!

It slept through the morning
and most of the day,
despite that my other foot
wanted to play.
It took a siesta.
It slumbered inert.
It nodded through dinner.
It dozed through dessert.

Now I'm in my bed
and I've been up all night.
I'm trying to sleep,
although try as I might,
my foot slept all day
(what a foolish mistake!)
now I can't fall asleep
'cause my foot's wide awake!
