Up in the Sky

Look up at the sky.
What do you see?
There are many things
found in the day sky.
You can see the sun and clouds.
What other things may be found
in the sky?

For teachers' inspection ONLY

You can look at the clouds,
but do not look at the sun.

The Sun

The sun is found in the day sky.
The sun is the brightest object
in the day sky.
It lights and heats the planet.
Nothing could live here
without the sun.

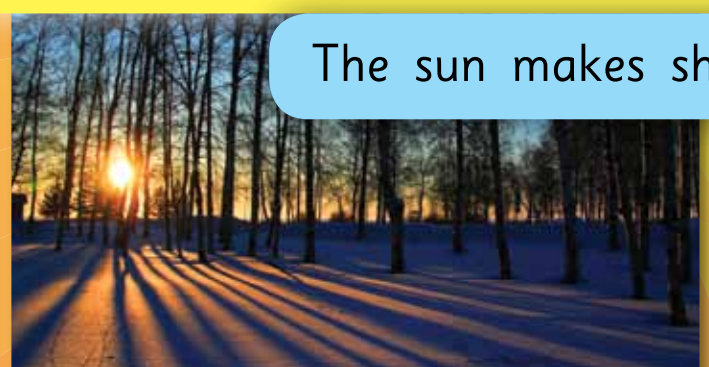

For teachers' inspection ONLY

The sun helps plants grow.

Sun in the Sky

You see the sun go
up and down in the sky.
The sun looks low in the sky
at the start and end of the day.
The sun looks high in the sky
in the middle of the day.

The sun makes shadow shapes
on the ground.

The sun makes shadows.

You see the sun
go down at sunset.
