Changing Weather

Weather can change.
It can be hot, cold, wet, or windy.
You can get wet
if you do not dress for the rain.
You can get burned
if you do not dress for the sun.

Put on a raincoat when you can tell it will rain.

For teachers' inspection only

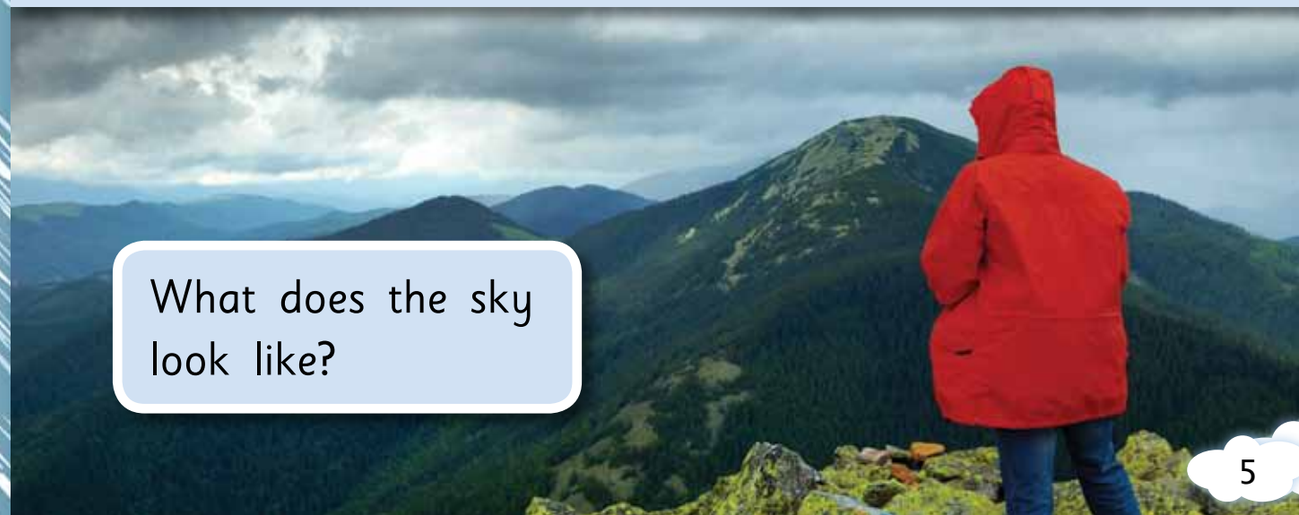

Put on a sunhat when you can tell it will be hot.

The Weather

There are many ways you can tell what the weather is like.
You can see, hear, and feel it.

Look at the sky.
Are rain clouds coming?
How hot or cold do you feel?
Can you hear the wind?

For teachers' reception ONLY

The Wind

How can you tell
where the wind comes from?
Is it blowing from north, south, east, or west?
Put out a weather vane.
A weather vane blows in the wind.
It points to where the wind comes from.

Here, the wind comes from the south.
