
Why Crow Is Black
Retold by George Ivanoff
Illustrated by Fraser Williamson

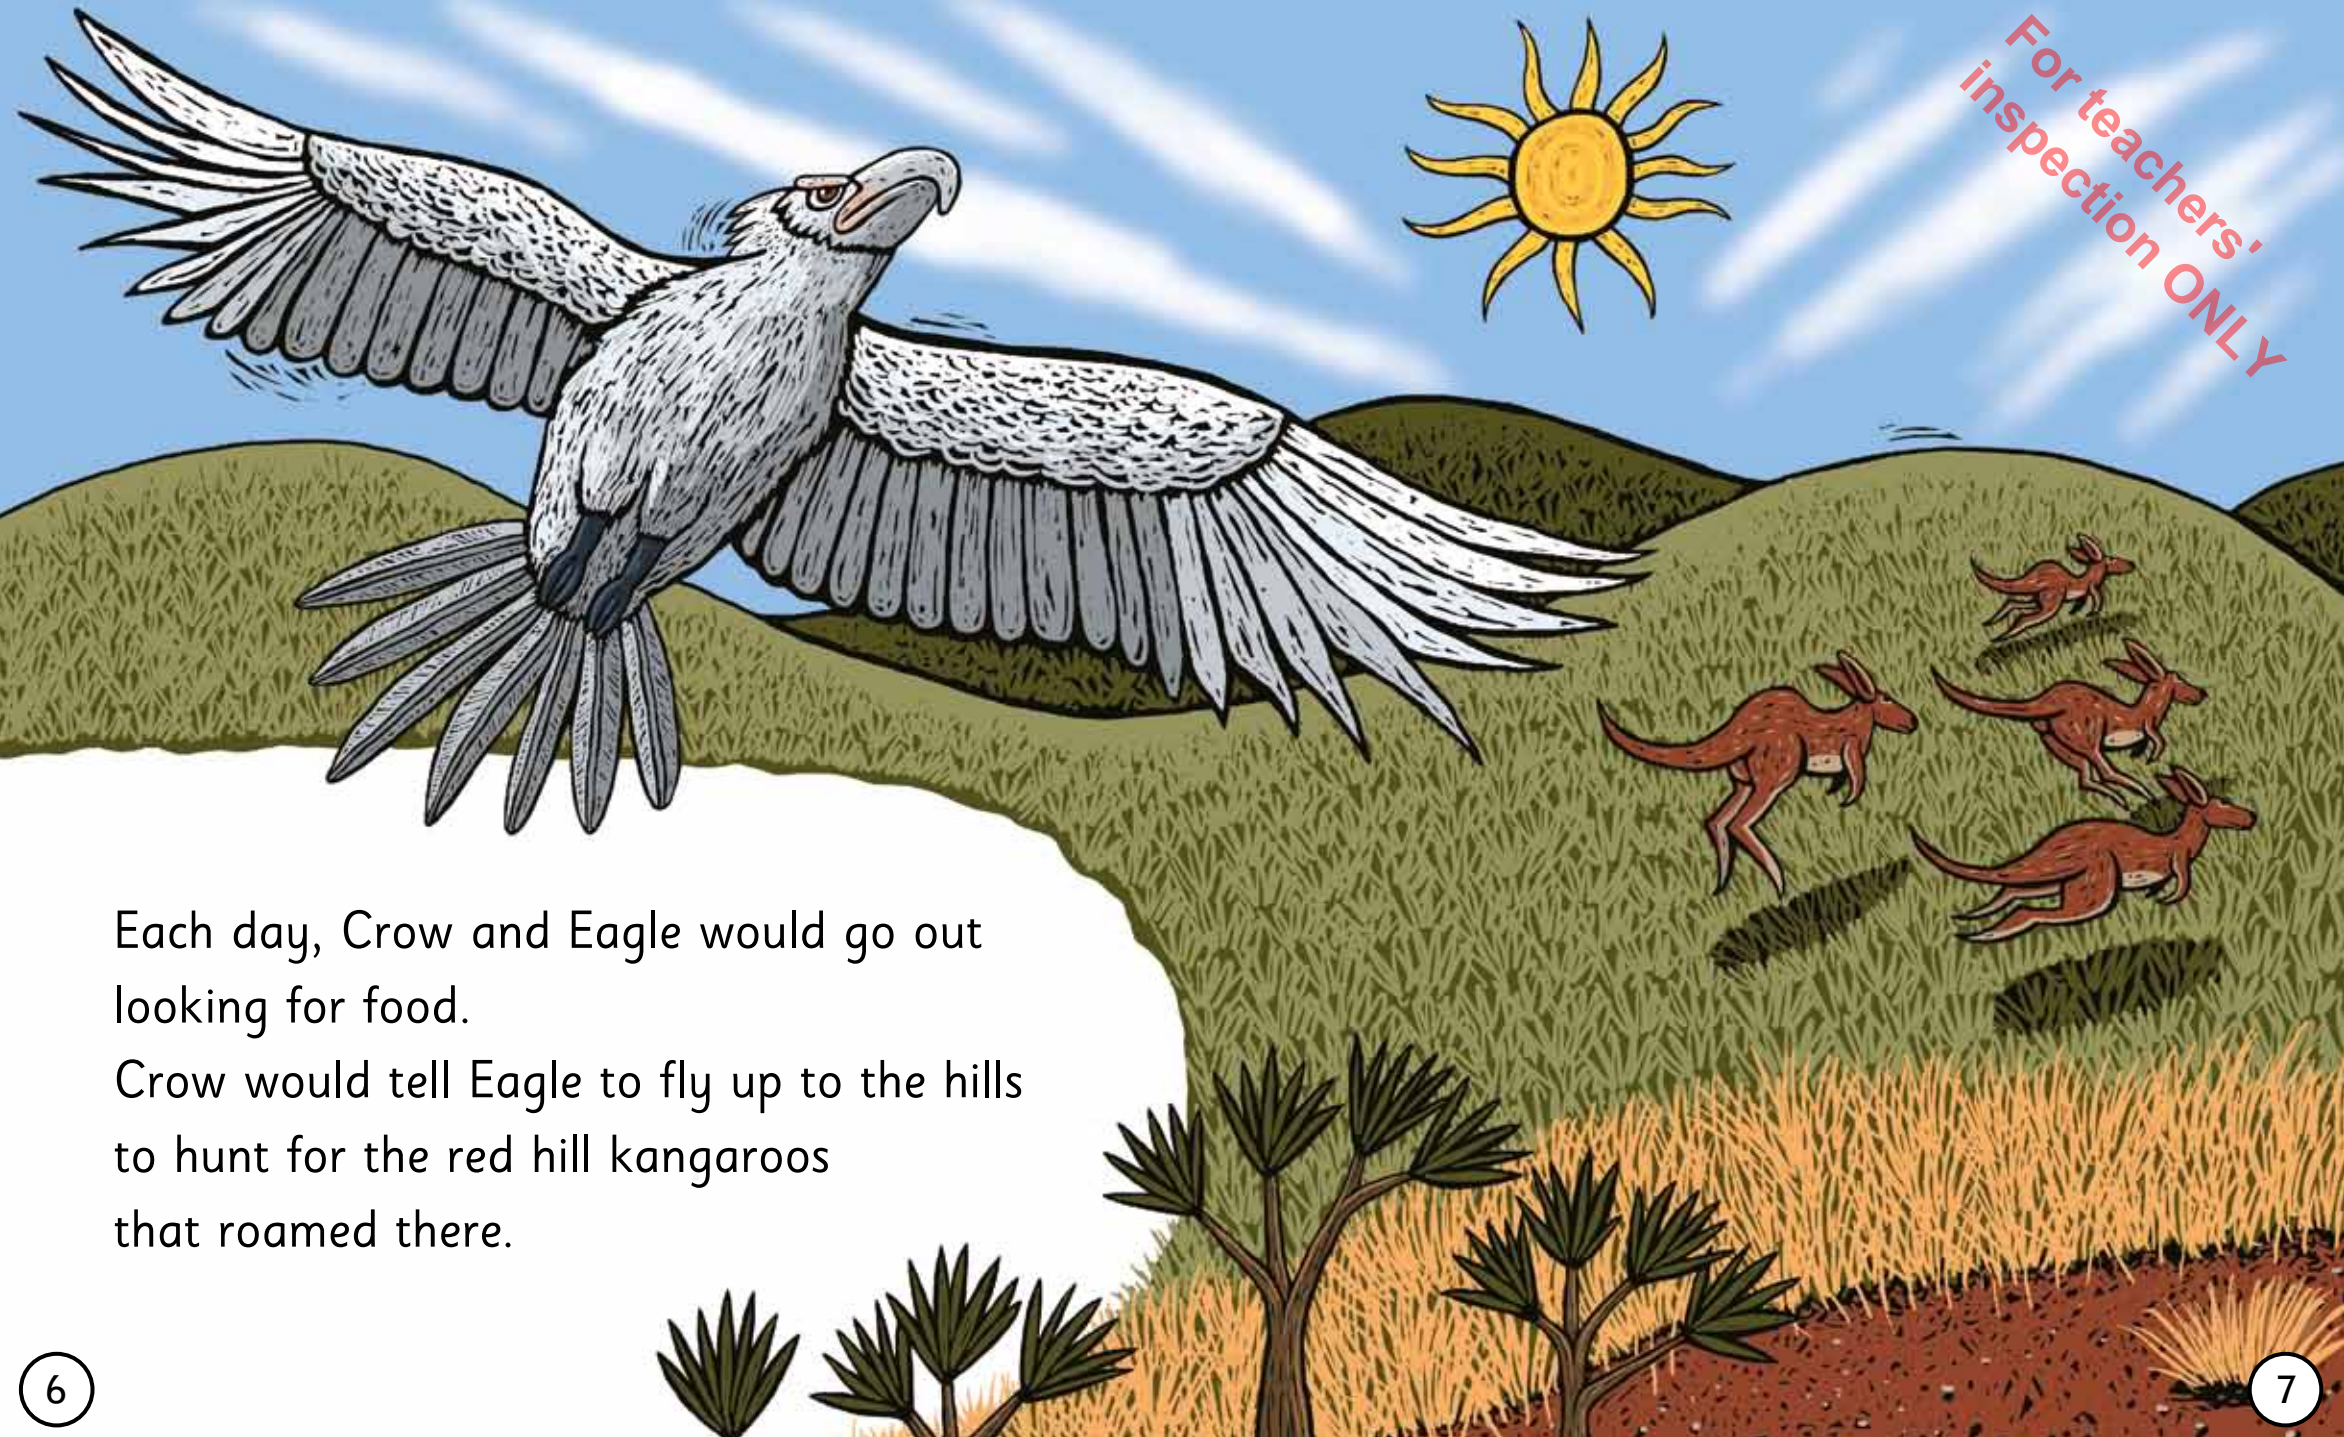

Crows have not always had black feathers.
Many, many years ago,
they had white ones.
This is the story of how
Crow's feathers changed colour.

For teachers' inspection ONLY

Thousands of years ago,
two birds lived with each other in the bush.
They helped each other, as friends do.
Crow was white.
Eagle was also white.

Each day, Crow and Eagle would go out looking for food.
Crow would tell Eagle to fly up to the hills to hunt for the red hill kangaroos that roamed there.
