Plenty of Plants!

Plants grow all around us. They come in many shapes, sizes, and colors.

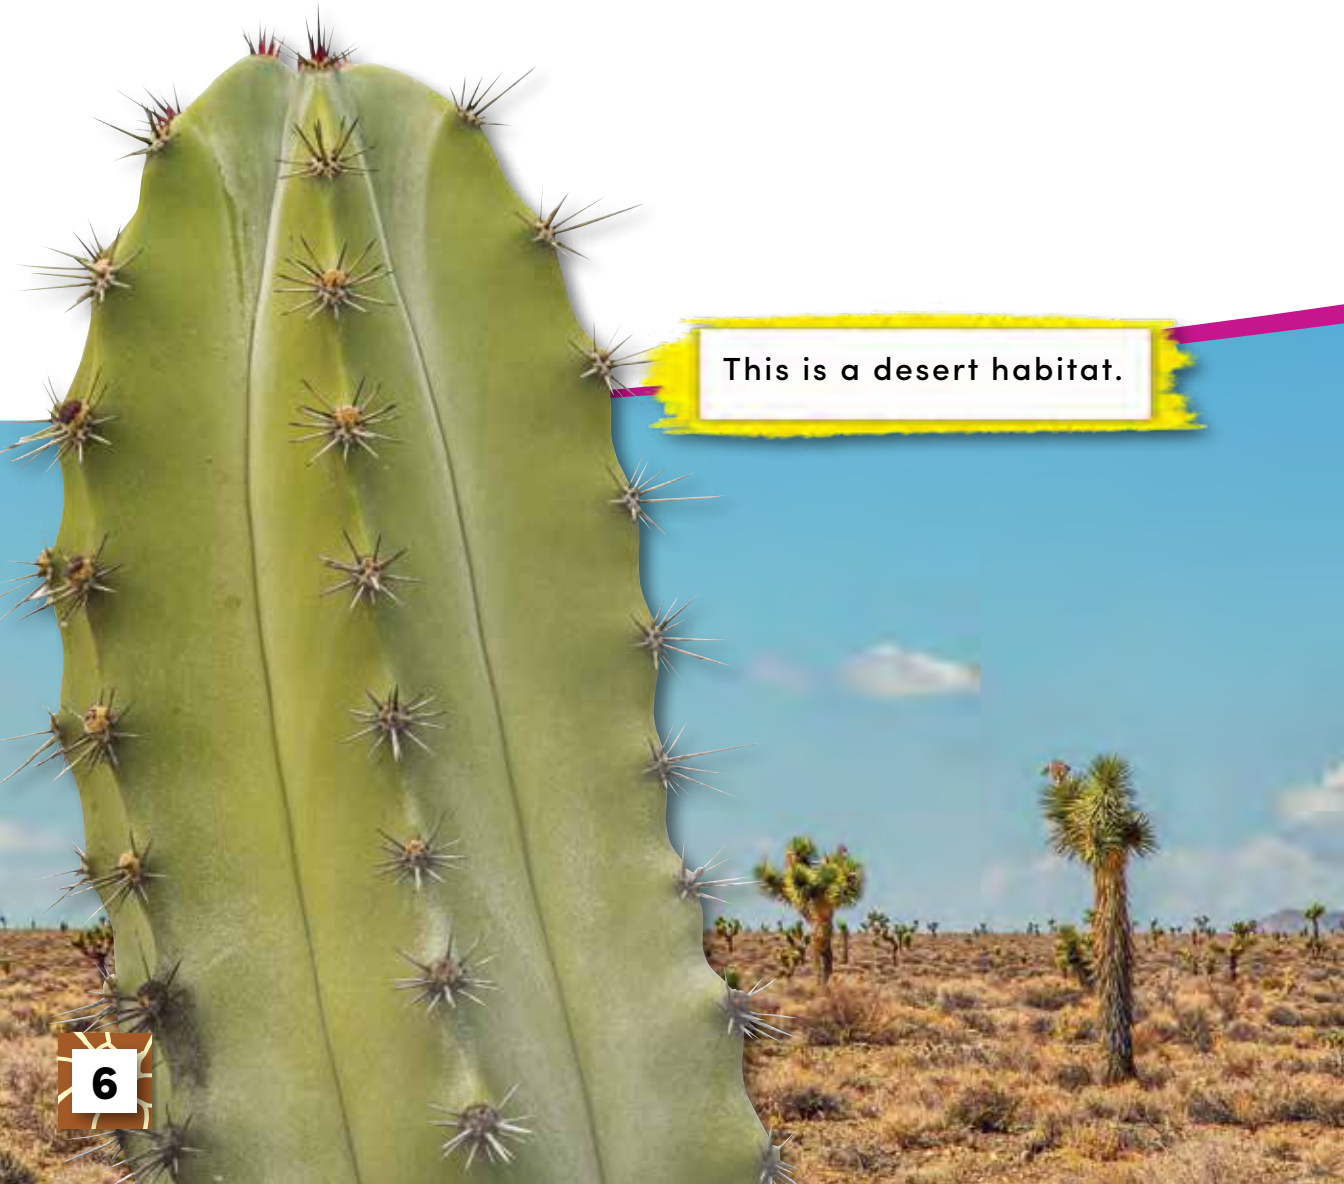

For teachers' inspection ONLY

Crunchy carrots and leafy spinach are plants that we can eat. Big tall trees and green grass are plants, too.

For teachers' inspection ONLY

Plants grow in lots of **habitats**. A cactus lives in the desert without much water. It stores water in its thick stems.

For teachers' inspection ONLY

In rainy places, plants have waxy leaves. The wax **protects** the plants from getting too much water.

There is plenty of water in a rainforest.

Growing Up Green

A plant starts life as a seed. The seed begins to grow if it is planted in the ground. It needs water, sunlight, air, and room to grow.

Blown Away

Some seeds travel by wind before they **sprout**.

Let's Do Science!

How does a plant get water to all of its parts? Try this and see!

What to Get

- crayons and paper
- food coloring
- plastic cup filled with water
- scissors
- white daisies
