Making a Rainbow

You see rain. You see the sun.

For teachers' inspection ONLY

You know what that means. You see a rainbow!

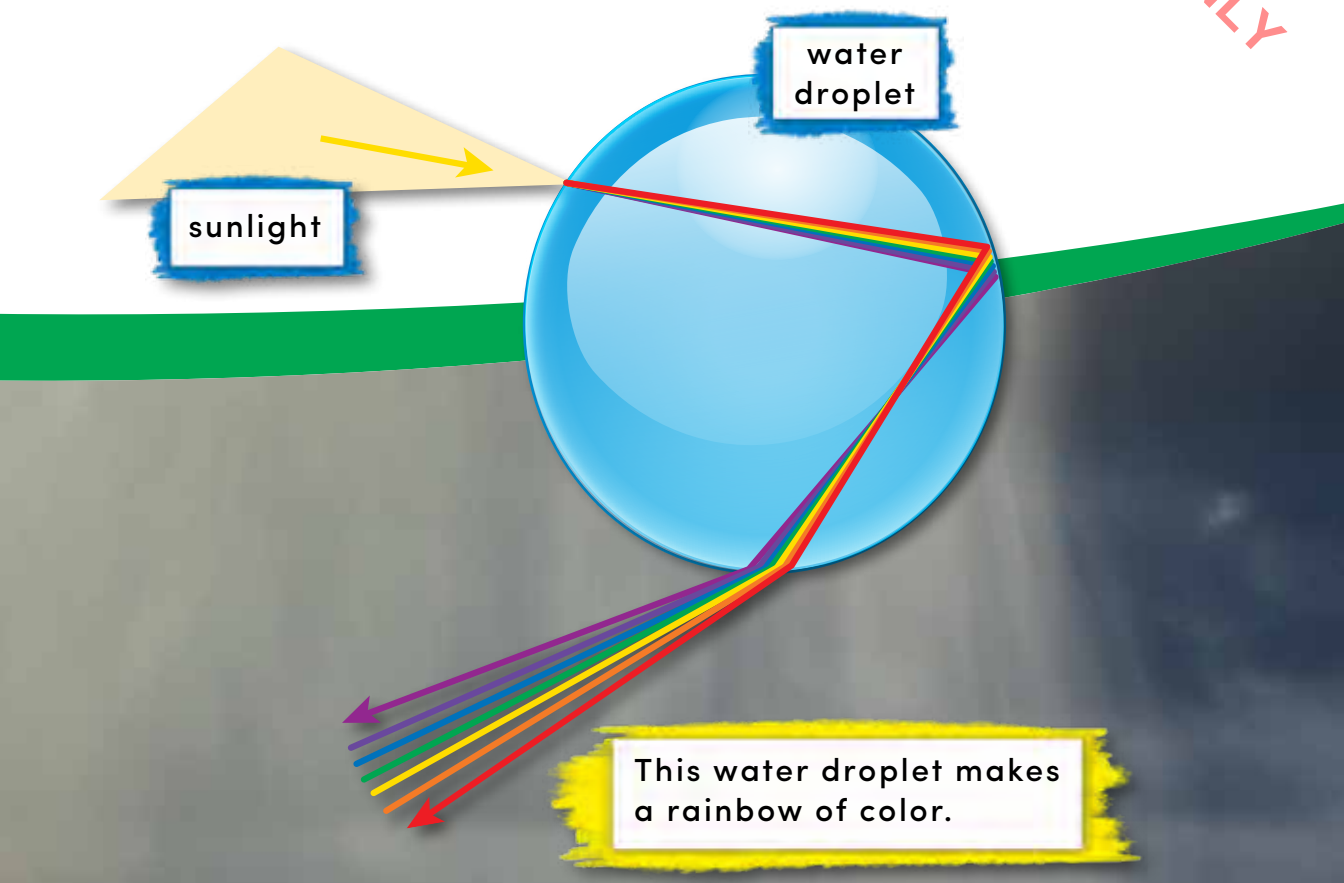

For teachers' inspection ONLY

A rainbow happens when light goes through water drops.

For teachers' inspection ONLY

The drops bend the light. When the light bends, it splits into colors.

What Is Light?

Light is a kind of **energy**. It moves very fast.

Energy

Energy is the ability to do work or be active.

For teachers' inspection ONLY

Scientists think light moves faster than all other things.

flashlight

All of the things on this page give off light.

sun
