Changing Earth

There are many changes on Earth during the year. Plants change. Animals change. The air, sky, and clouds change.

New plants change as they grow during the year.

For teachers' inspection ONLY

Lion cubs play and get stronger.

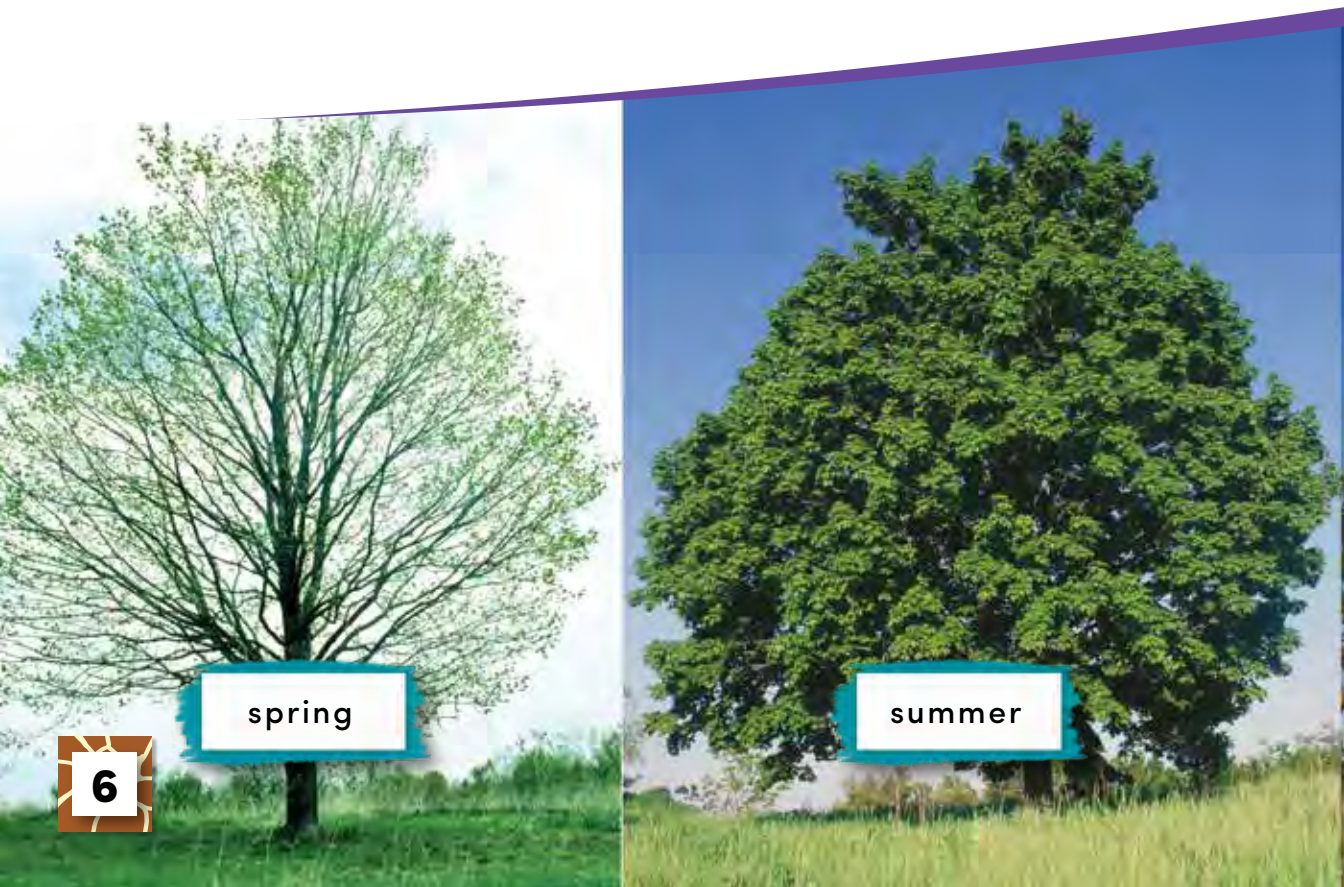

Young animals grow up.

Cycle of Seasons

Is there a first season? No, the seasons go in a **cycle** (SAHY-kuhl). There is no beginning or end.

For teachers' inspection ONLY

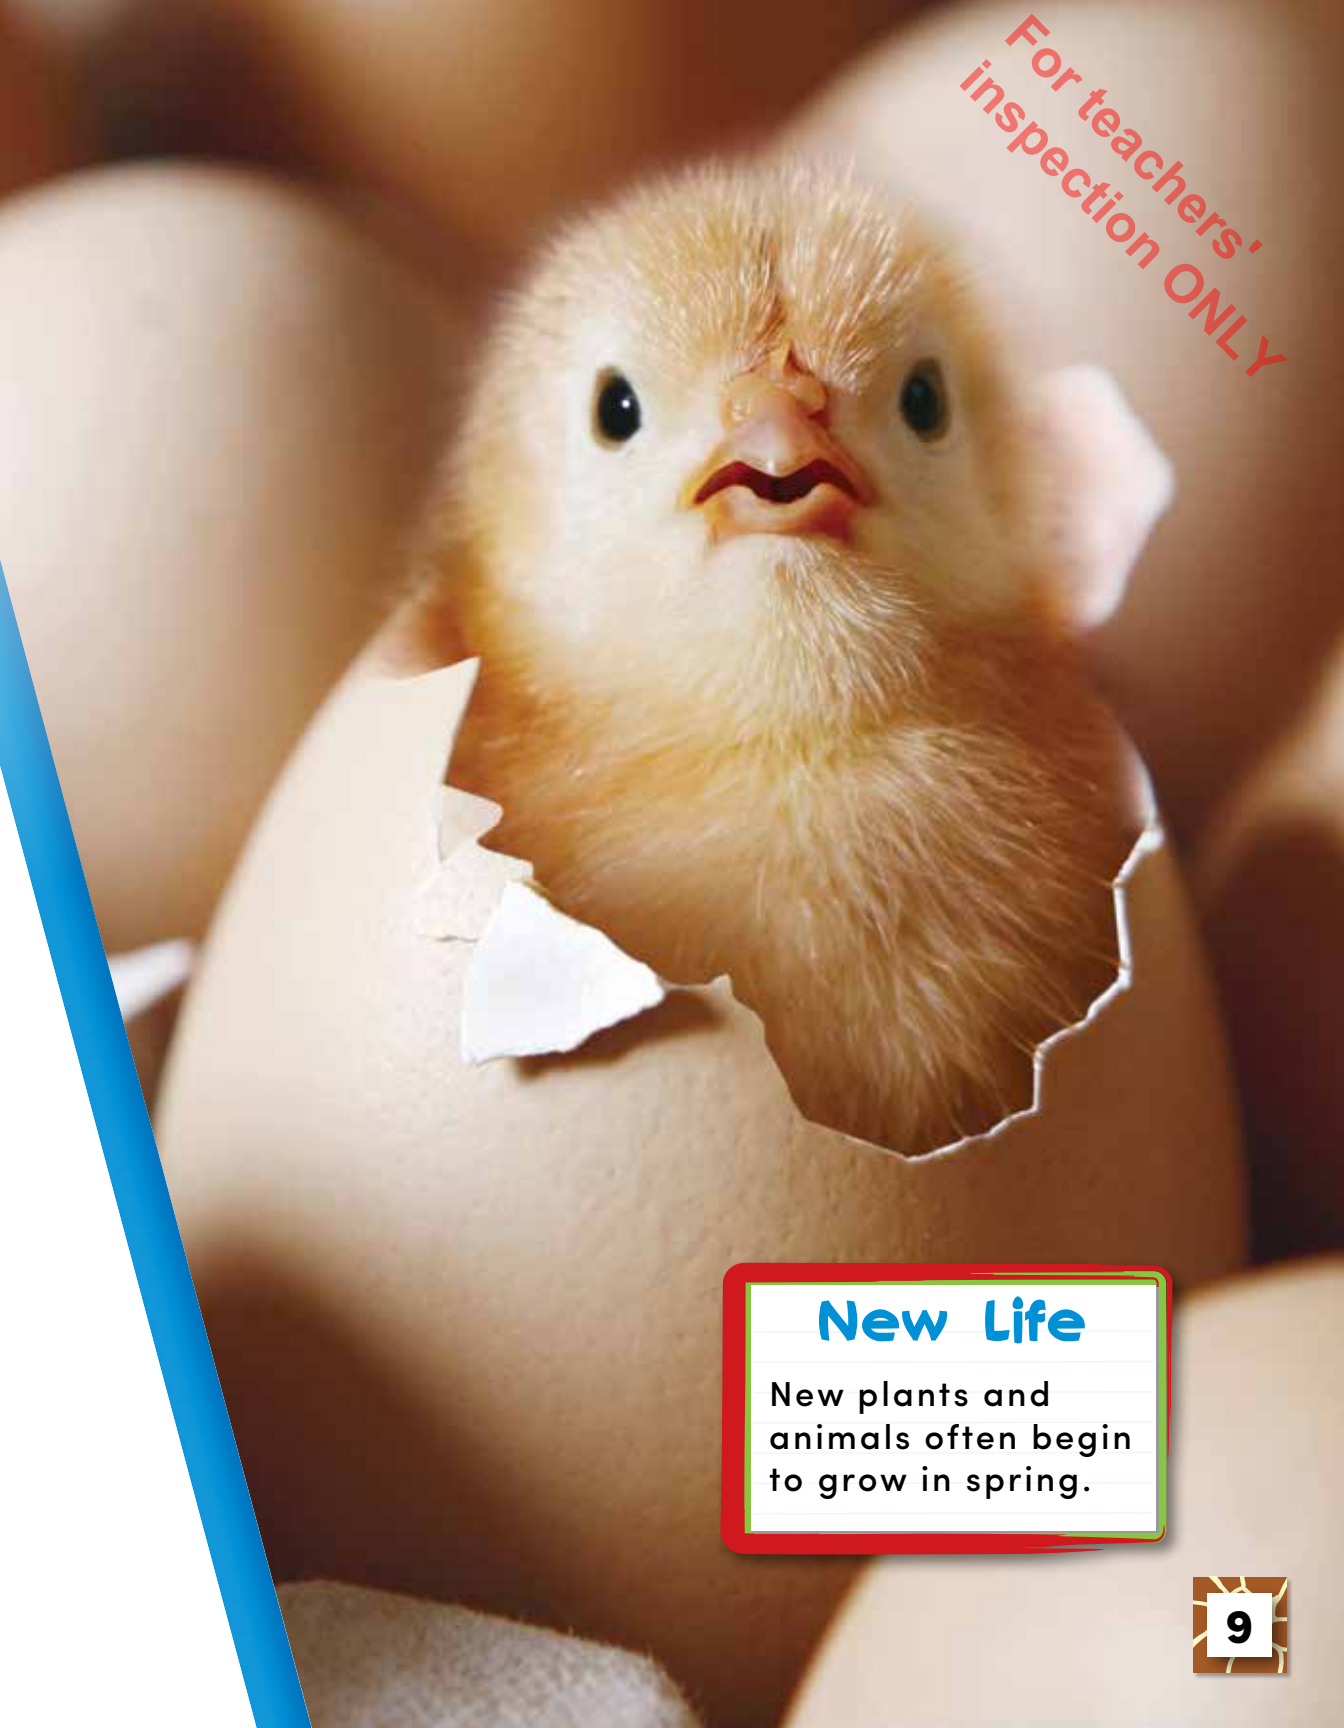

Season to Season

Plants grow in spring. It may rain. The air gets warmer. Many animals are born.

Rain helps plants grow in spring.
