Where Does It Go?

You have a piece of trash, so you throw it away.

This girl throws away her trash.

But where does the trash go?

The Dump

A landfill can also be called a **dump**.

For Review Only

Most trash goes to a **landfill**.

More trash is brought to a landfill.

For review only

What will happen when there is no more room for landfills? Where will the trash go then?

The trash is spilling out of this can.

Let's Do Science!

What happens when we reuse old containers? Try this and see!

What to Get

- clean, used plastic container
- glue or string
- paint or decorations
- scissors

What to Do

1. Look at the container. Think of something that you can make out of it. It may be a toy or an animal. It may be a place to keep things.

2. Have an adult help you use scissors, glue, or string to make your new item. Then, paint or decorate it.

3. Talk about what you made. What would happen to the container if you did not make something new out of it?
