The Rain Forest

A rain forest is a dense forest with plants and animals. It rains a lot and is very humid.

There are different rain forests all over the world.

▲ The hot Amazon rain forest.

Different wildlife lives in a rain forest. There are many different types of plants.

Rain forests have trees that are big and tall.
Many fruits and flowers grow in the rain forest.

Rain forests contain most of the world's plant life. These plants give us oxygen. Plants and animals need oxygen to live.

Rain forests are also very wet. All of the rain in a rain forest helps plants grow. We need the rain forests.

Many types of animals live in the rain forest. There are insects and lizards.

Madagascar
day gecko

butterfly

There are monkeys and birds, too. There are big cats like leopards and tigers in the rain forest.

green hermit
hummingbird
