What Is a Clock?

A clock helps us measure and tell time.
There are many kinds of clocks.

This is an antique
wall clock. ►

There are sun clocks and sand clocks. Both clocks tell time.

This is a sand clock. ▶

▼ 10:00 a.m.

There are wristwatches and clocks.

Wristwatches are designed to be worn around the wrist, attached by a watch strap.

▼ This boy looks at his wristwatch.

There are alarm clocks. The job of these clocks is to wake people from their night's sleep or nap.

▼ This clock has an alarm.

There are little clocks
and big clocks.

There are digital watches
and analog watches.

▲ This watch
is digital.

▲ This watch
is analog.

Digital clocks and watches have a screen with numbers. It is very easy to tell time that way. You just have to read the numbers on the screen.

◀ This digital clock says eight o'clock.

◀ This digital watch says one o'clock.

Analog clocks have numbers and hands. The hands are like little arrows. The arrows point to the numbers.

▲ This is an analog clock.
