Chapter 1: **Kids Saving the Environment** **1** |

The Doggy Dung Disaster (Japan)	2
--	----------

Haruka Maruno invents an environmentally friendly poop scooper and saves Japan from mountains of smelly dog poop.

The Longest Walk (Mexico)	6
--	----------

When Omar Castillo Gallegos learns about the destruction of the Mexican rainforest, he takes a walk—a long walk—to save it.

Turtle Power (USA)	12
---------------------------------	-----------

An Illinois housing development threatens the habitat of turtles. That's when Henry Cilley gets tough.

Plastic Bags Sacked (India)	18
--	-----------

Harshit Agrawal founds an environmental protection club in India to cut down on the use of bags—paper and plastic.

Show Me the Water! (Australia)	23
---	-----------

Koalas and wallabies aren't the only things in Australia that need Amy Beal's help—the Murray River is getting lower every year.

Comic Book Hero (Japan)	28
--------------------------------------	-----------

It's a bird! It's a plane! It's Aika Tsubota's comic book! The book on protecting the environment is the talk of Japan—and the world!

Chapter 2:

Kids Standing Up for Themselves 32

Top of the World (India) 34

What would you do if people told you girls can't climb mountains? If you're Santosh Yadav, you prove them wrong.

When Small Voices Unite (Colombia) 39

Farliz Calle is student-body president, but can she stop a civil war? With the help of the Colombian Children's Peace Movement, she plans to find out.

Come Together (Kosovo) 44

Ivan Sekulovic and Petrit Selimi are from opposite sides of an ethnic conflict. That doesn't stop them from uniting for peace.

Get Up, Stand Up (USA) 49

What would you do if you weren't included in some classes because of your race? Malika Sanders doesn't take this injustice sitting down.

Living Proof (Canada) 54

Jean-Dominic Levesque-Rene is watching *The Simpsons* when he feels a lump in his neck. He fights his cancer at the same time he fights use of the chemicals that caused it.

From Rug Maker to Rescuer (Pakistan) 59

Iqbal Masih escapes from a Pakistani rug factory and speaks out against child labor – even though he knows there's danger involved.

Chapter 3:

Kids Helping Others 64

Hear That? (USA) 66

Talk about a cool science-fair project! Ryan Patterson invents a sign-language translator. Will it help him get a date?

Pop Art (Japan) 70

Junichi Ono is an art prodigy who uses drawings to help heal the world.

Early Warning System (United Kingdom) 74

A bad day at the beach turns tragic when a tsunami strikes the coast of Thailand. But because of Tilly Smith, many people in danger find safety.

Workers Unite! (China) 78

Chen Chiu-Mian is in the house and she's fighting for workers' rights in China.

Sow What You Reap (Ghana) 83

In Ghana, many kids spend their days gathering firewood. That is until P.B.K.L. Agyirey-Kwakyee decides to plant some trees!

Ryan's Wells (USA) 87

To a six-year-old, \$70 is a lot of money. But that's what Ryan Hreljac has to raise to dig a well in Uganda. And that's just the beginning.

Chapter 4:

Kids Overcoming Challenges 92

Back on the Board (USA) 94

Like a lot of people living in Hawaii, Bethany Hamilton loves surfing—just not with sharks. After losing her left arm, will she find the courage to surf again?

A Wish to Breathe Free (Romania) 99

After Izidor Ruckel is adopted from a Romanian orphanage he becomes the voice of all the children left behind.

The Matchless Girl of Matches (Bangladesh) 104

Fatema Begum uses chickens, a sewing machine, and an education to free herself from a match factory in Bangladesh.

Lemons to Lemonade (USA) 109

The sign says *Alex's Lemonade Stand for Cancer – 50 Cents a Glass*. Alexandra Scott isn't just raising money for cancer research—she's fighting for her life.

New Land, New Life (Ethiopia) 114

Mawi Asgedom and his family walk across the desert to escape war in Ethiopia. Can they find a better life in a new land?

A Leg Up on the Competition (USA) 119

Rudy Garcia-Tolson is a powerhouse triathlete with no legs but a lot of heart.

Chapter 5:

Kids Using Talents and Creativity 124

See It to Believe It (India) 126

Kruti Parekh eats fire and walks over hot coals.
But her biggest trick is bringing trash back to life.

Outta This World (USA) 130

What's so unusual about Christopher Paolini? Well, for starters, he's the author of the best-selling *Eragon*.

Sports Hero (Vietnam) 135

Nguyen Ngoc Truong Son is a chess champion from Vietnam who sets out to make history.

Beyond His Years (USA) 140

Mattie Stepanek's books of poetry not only make the bestseller list but change people's lives.

Young Master Yani (China) 144

Wang Yani is a master with a paintbrush. Find out how she tours the world with her paintings of monkeys.

Snail Paint (USA) 148

Vaishali Kiran Grover uses her skills as a scientist to keep snails out of her garden and stumbles onto a major discovery.

A Note from the Author 153

Water!, p. 23**

The Doggy Dung Disaster

HARUKA MARUNO

Would you believe that a 12-year-old Japanese girl was named one of nine “Heroes for the Planet” by *Time* magazine for picking up dog poop? What’s even weirder is that this girl, like most people, *hated* picking up poop.

“It was gross,” Haruka Maruno told *Time* magazine in 2000. Every morning when Haruka walked her dog, Patrick, she grimaced when she had to scoop his poop with a plastic bag over her hand. It felt warm and mushy, like a handful of, well . . . dog poop. Yuck!

But it turned out that cleaning up after Patrick with a plastic bag was more than just gross—it was also harming the environment. Just like they keep your sandwich fresh for lunch, plastic bags also keep animal waste from decomposing—breaking down back into the earth. Instead of becoming fertilizer, the poop-bag combo just sat in the local landfill looking disgusting, smelling bad, and taking up space.

Japan has over 10 million dogs, which produce over 2 million pounds of waste daily. That's a massive mountain of poop every day. Just imagine what the mountain might look like after a *month*! And because Japan is a small island, there isn't a lot of extra space. As much as people would have liked to keep mountains and mountains of dog poop sitting around, there just wasn't enough room. . . . Japan had a real doggy dung disaster.

Haruka Maruno decided to do something about it.

"What else could I use to scoop poop?" she thought. A shovel might work, but you couldn't just throw the whole shovel away. People would have to wash it when they were done—not very convenient. Maybe a plastic cup, but it might get a little messy, and messy was the *last* thing she wanted. Finally Haruka found a way to cut and fold an empty paper milk carton into the ultimate poop scoop.

JAPAN

population: 127 million

capital: Tokyo

The best part—other than being much less gross—was that the paper scoop allowed air and microbes to get in. You could throw the scoop away, and after a while everything would be gone, decomposed back into the earth like ice cream melting in the sun. No more taking up space in a landfill.

Haruka entered her “paperscoop” in an invention contest, held in her city of Miyakonojo. Her poop scoop won first prize! But that was not enough for Haruka.

Fast Facts

Tokyo and the surrounding region is the most densely populated metropolitan area in the world.

She thought about it: if only a few people knew about the paperscoop, it wouldn't get used enough to make a big difference. Haruka needed more than just a paperscoop stand on the corner if she wanted to win

the battle against gross, smelly dog poop. She knew this was where her dad, Isamu, might be able to help. He was a businessman and helped Haruka set up her own company, which they called “Haruka Family.”

Imagine what life is like for most seventh graders you know. Now imagine a seventh grader running a major company that sells environmentally friendly products. It wasn't easy! At 12 years old, Haruka Maruno was not only an inventor, but a sharp businesswoman as well.

Every day, Haruka came home from school, grabbed a snack, and then got to work. She and her father had to find a factory that could turn recycled milk cartons

into “Haruka’s Paperscoops.” They had to hire employees and keep detailed records of exactly what they sold and where. They also had to convince stores all over Japan to put a product on their shelves that encouraged people to get up close and personal with dog poop.

All of this hard work paid off. The poop scoop was a hit in stores. And the government of Japan took notice of the paperscoop and asked Haruka to represent Japan at the Children’s Conference for the Environment in Africa. The conference, sponsored by the United Nations, gave Haruka the chance to talk about her special poop scoop with kids from many countries around the world. Her paperscoop was even used by the city of Miyakonojo as part of its Good Manners Project.

Today, Haruka Maruno has graduated from high school. She now gives lectures about intellectual property rights. Haruka continues to run her business online while working on inventions that help preserve the environment. You can be sure that the world will be a better place because of her work!
