I Can Make a Paper Plane!

Written by Delilah Jones

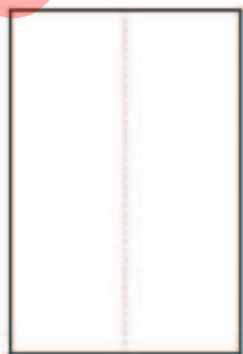

Free Download

Let's make a paper plane.
Get some paper.

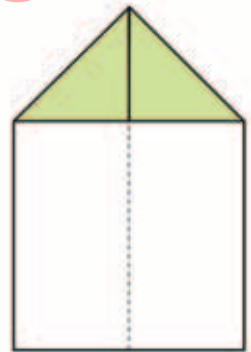

Fold the paper in **half**.

Unfold the paper.

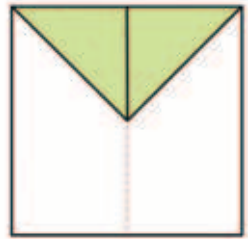

Now the two sides are the same size.

Next, fold the **top** two **corners** to the middle.

It looks like a house.

The top is a triangle.
Fold the top down.

What does it look like?

Fold the top two corners to the middle.

They are on top of the triangle.

The two corners look like arms.

Is it starting to look like a plane?
