What Are Otters Like?

Written by Kelly Daniels

Free Download

These are otters.
They live in rivers.

Otters are funny animals.
They are like penguins
and polar bears.
They are like cats, ducks,
and fish, too!

Penguins are dark on their **backs**.
They are light on their **stomachs**.

Otters are like that, too.
They are darker on their backs.
They are lighter on their stomachs.

Polar bears have special **fur**.
This fur keeps them warm in cold
water.

Otters are like that, too.
They have special fur.
It keeps them warm in cold water.
