Weekend Art Fair

Today is art fair day! You look through the displays. Many paintings are dripping with bold color.

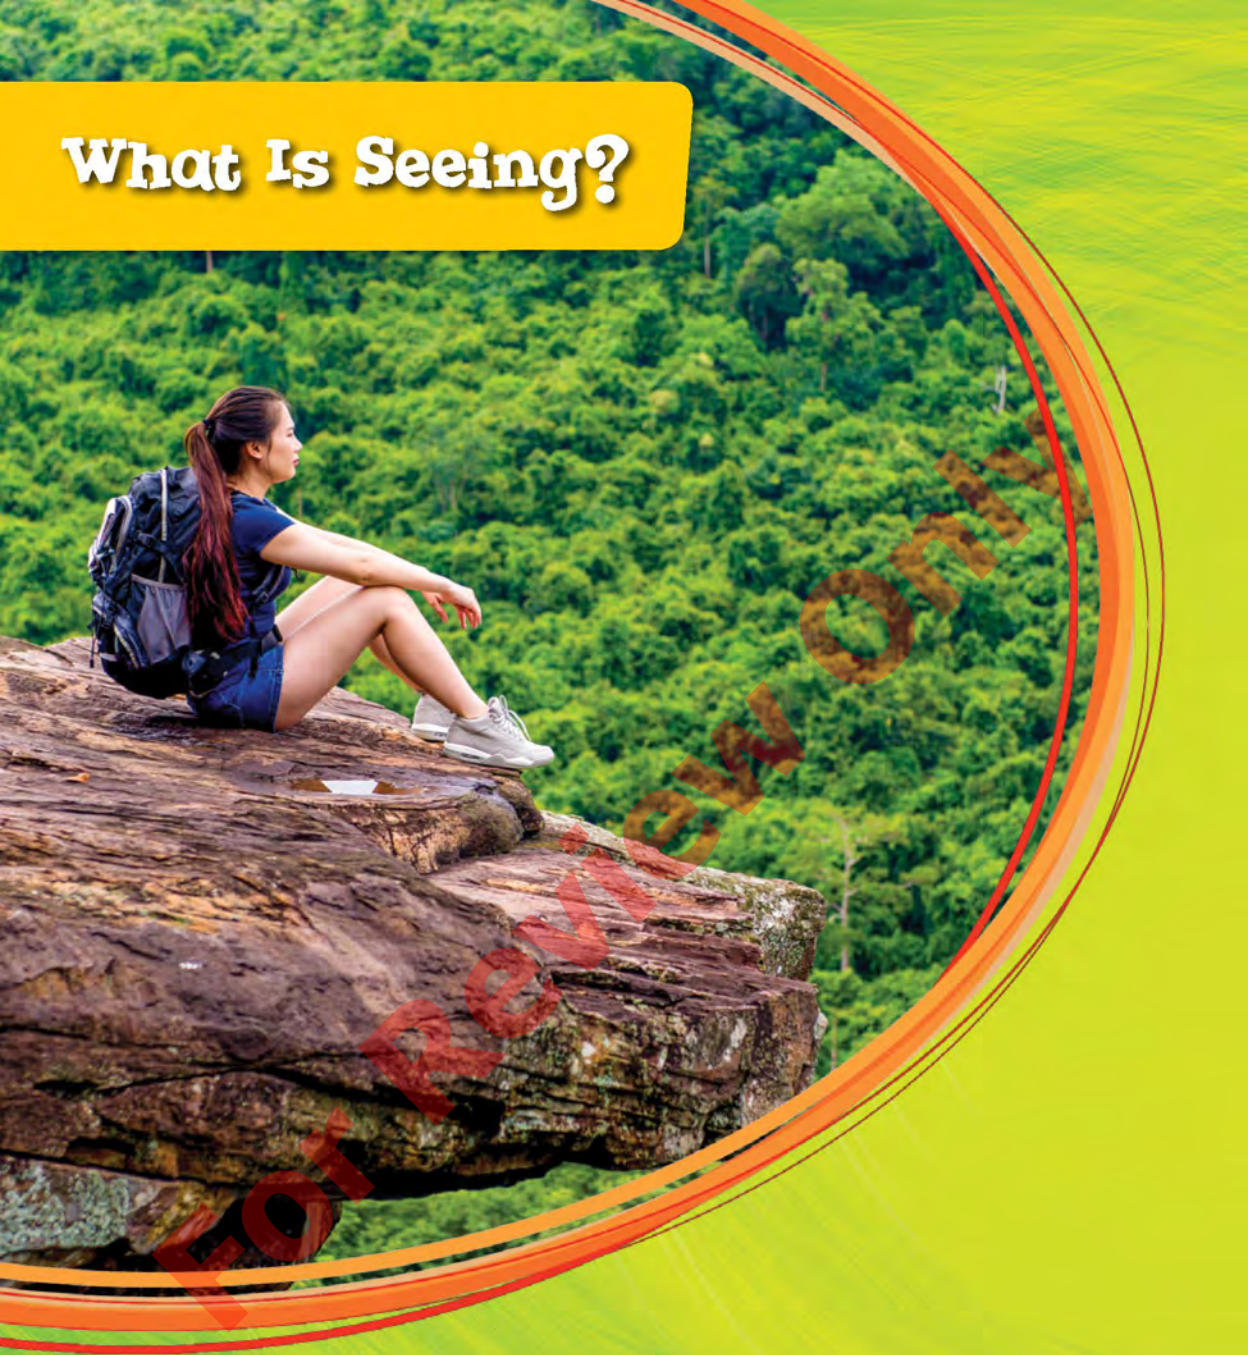

Interesting shapes
catch your eye. You
bend close to study
each work of art.

You look up as you leave the fair. The sky is just starting to glow pink.

What Is Seeing?

Our eyes allow us to see the shapes and colors of our world.

The objects we see either make or **reflect** light. Some of this light reaches our eyes.
