Around the Campfire

You unzip your tent and step inside. The **musty** smell brings back fun memories.

Later, you help with
the campfire. The
scent of smoke fills
the air.

Your favorite campfire activity is toasting marshmallows. You enjoy the company while you wait for them to cook.

Oh no! What is that burnt smell? Cooking over a fire is hard. But you are having so much fun, it does not matter.

What Is Smelling?

We use our noses to smell everything from yummy food to stinky socks.

All scents come from
tiny **molecules** floating
through the air.
