Look Out!

Look out!

A snowball!

teacher's inspection only

Lin sees it.

She moves.

teacher's inspection only

Eyes are amazing!

They get information.

They send it
to the brain.

Then we know
what we see.

teacher's inspection only

We can see in color.

Wen sees a rainbow.

Parts of the Eye

iris
The colored part of the eye; it has muscles in it that change the size of the pupil.

retina
The back wall of your eye; it is the location of the eye's rods and cones, which allow you to see colors.

pupil
The black circle that lets light into the eye.

lens
The clear part of the eye that focuses light.

optic nerve
The long nerve that receives messages and sends them to the brain.

Picture Glossary

brain
The "message center" part of your body.

rainbow
An arc of different colors that occurs when sunlight shines through a mist.

clear
See-through.

snail
A small animal with no legs, a soft, slimy body, and a shell on its back.
