Sniff It!

Meg sniffs.

What does she smell?

teacher's inspection only

Jed smells smoke.

Oh, no!

There is a fire.

He calls 911.

teacher's inspection only

Jo runs up a hill.

Whew!

She breathes
in and out.

Parts of the Nose

olfactory bulb and olfactory epithelium
The epithelium has receptors that "catch" smells. They send them to the bulb, which sends them to the brain.

mucus membrane
The thin tissue inside the nose that makes mucus.

nasal passages
The areas behind your nose where air travels.

nostrils
The two holes on the outside of your nose that take in and let out air.

septum
The part between your nostrils; it is made out of cartilage.

Picture Glossary

brain
The "message center" part of your body.

germ
A very small living thing that can make you sick.

dust
Very fine powder that builds up on the surface of things, like furniture.

mucus
A thick liquid that is made by the body; when it combines with dirt and germs, it makes boogers.
