Animal Pairs

“Class, please get into pairs,” says Mr. Li.

Ava counts eight other kids.
That makes nine total.

“I can’t make a pair,”
Ava says.

“Oh, that’s right. There are
nine students. Nine is an
odd number. It can’t be
split into pairs. We will
have one group of three!”
Mr. Li says.

Ava joins Joe and Nate.

They watch the fish.

Three swim by.

Three is an odd number.

Let's Review!

Flip to page 5. How many fish can you count? Is it an odd or even number?

A. 7

B. 8

C. 9

D. 10

Picture Glossary
