Let's Go!

I hop onto the school bus.

Time to get going!

I wonder what
transportation was
like in the past.

Say transportation like
trans-pur-TAY-shuhn

Long ago, people walked almost everywhere.

They rode horses and donkeys, too.

Some people used small boats.

About 5,000 years ago, people made the first wheel.

Later, they put wheels on carts.

They made big wagons to carry things around.

Boats Over Time

The first boats were small rowboats or canoes. They were made of wood or grass.

Then, boats got bigger. Ships had large sails. Many people traveled together in ships.

Today, ships have engines to make them go. They can carry thousands of people across oceans.
