Look CLOSER

The world is full of tiny things.
Some are too small for our
eyes to see. A microscope or
hand lens can help!

For Review Only

A lens is a curved piece
of glass. It bends light.

When you look through a lens,
a thing looks bigger than it is.

WHAT IS A HAND LENS?

A hand lens is small and easy to carry. You can put it in a backpack to take with you. Let's go explore!
