# PB3 Recycles

T

his is planet P3. Planet P3 is very different to our planet, Earth. To start with it isn't round! The objects they have on Planet P3 are different too.

They don't have apples or rivers or monkeys or clocks  
and ... the only colours they have are grey, black, green  
and white.

Here is an E.T. from Planet P3. His name is PB3 and here is his robot, Robin ... Oh dear! What's the matter with Robin? She's going round and round!

PB3 calls the doctor. The doctor gives Robin an injection and she stops going round and round.

PB3 and the doctor look inside Robin. The doctor takes out a needle. The needle is made of wood and not of metal. This is because Robin is an old robot. Now there are no trees on P3 and ... the needle is broken. The doctor tells PB3 to throw Robin in the rubbish and buy a new robot.

NO! Robin is my friend! Where can I find trees?

Hmmm! The only planet with trees is Planet Earth.
