

Lost Kitten

Level
4

John D. Smith

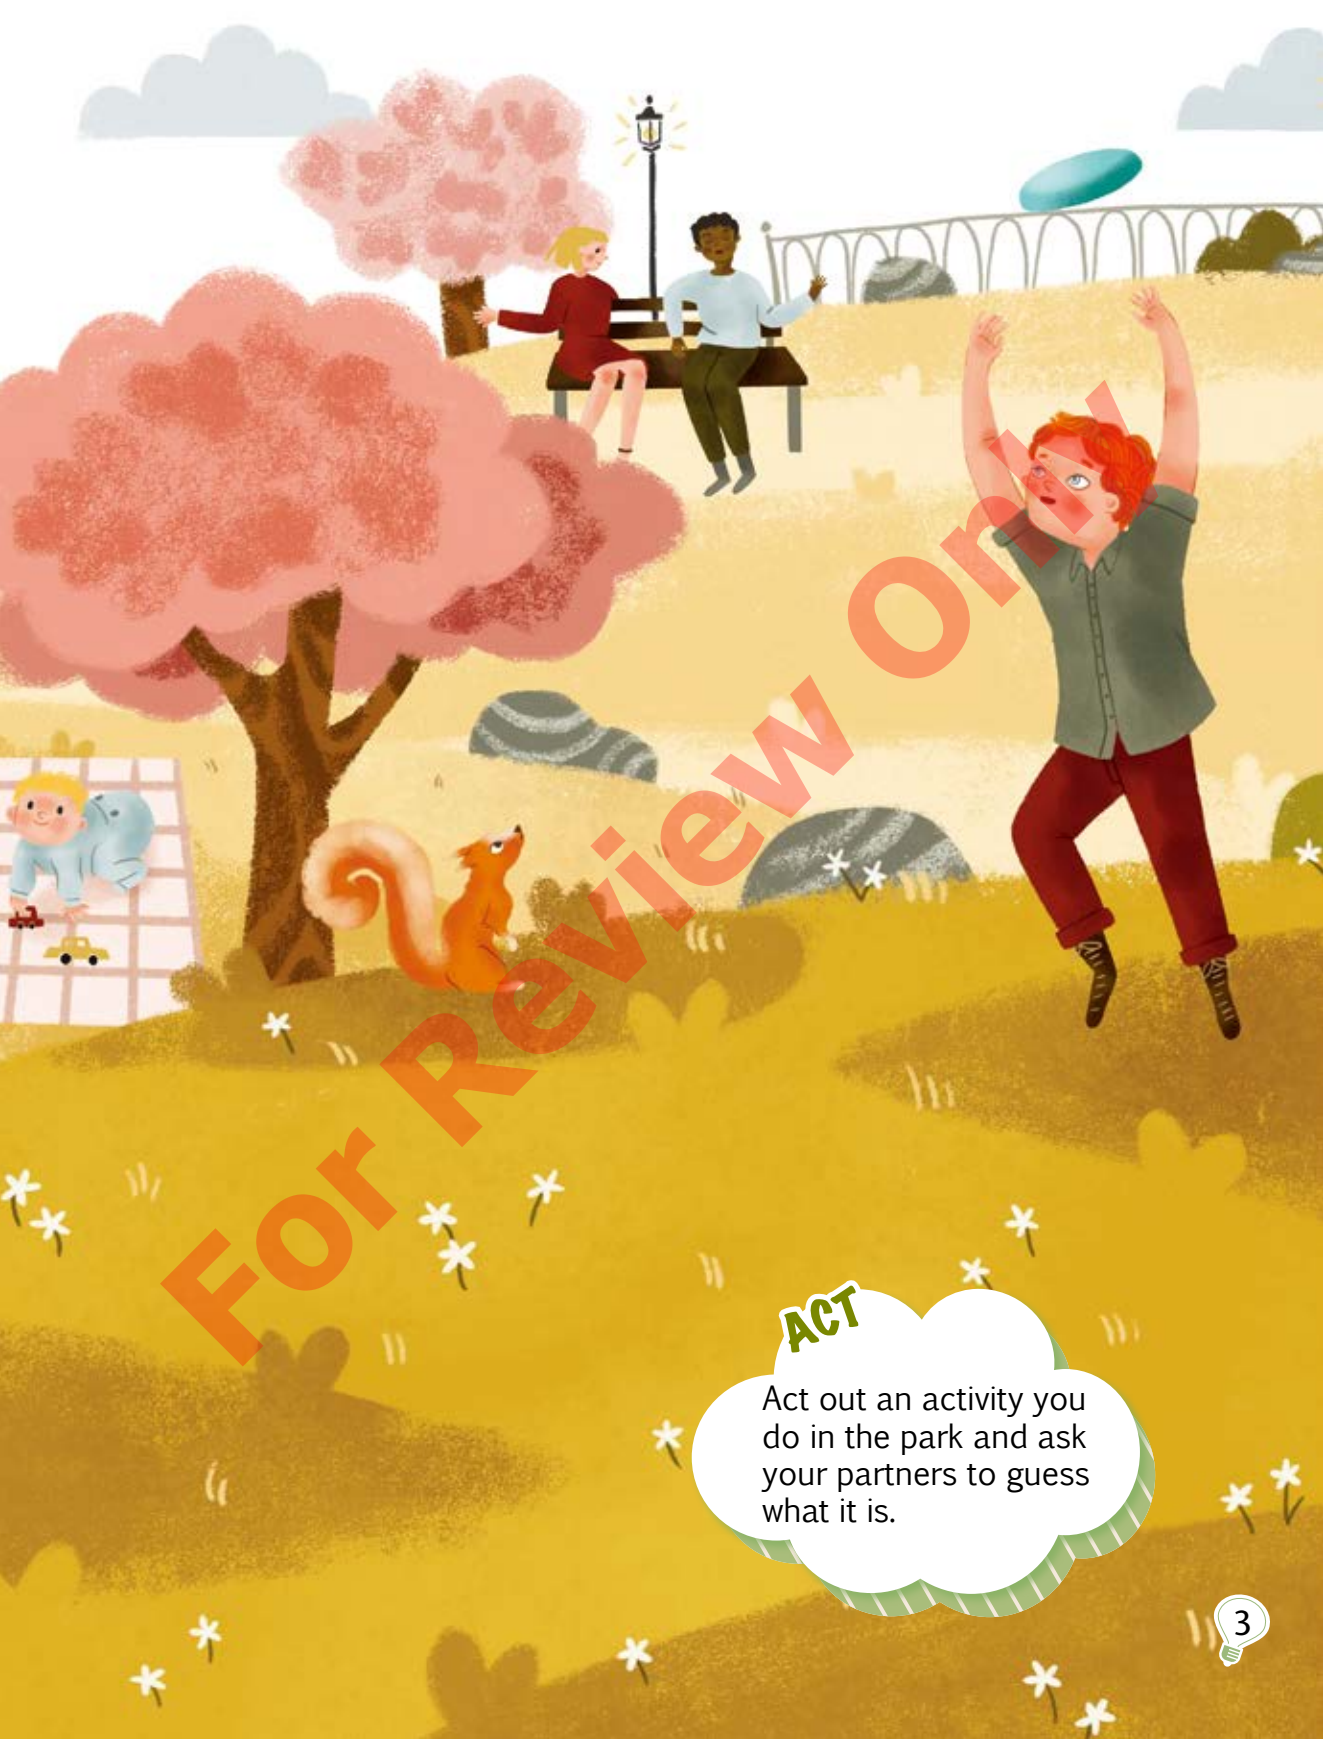

I'm Julia, and this is my younger brother Jasper. Want to go to the park with us and play Frisbee? Come on, it'll be fun!

It was a beautiful summer day. Jasper and Julia played Frisbee in the park. Julia threw the Frisbee too far, and Jasper missed it. "Where is it?" asked Jasper. "Maybe it's in the bushes," said Julia.

For Review Only

ACT

Act out an activity you do in the park and ask your partners to guess what it is.

Jasper and Julia looked for the Frisbee near a big tree. They heard a strange noise.

“Is it a baby crying?” asked Julia.

“I don’t think so. It sounds like a cat,” said Jasper.

“Where’s the noise coming from?”
asked Julia.

“It’s coming from the tree!” said Jasper.

SPEAK

Make the sound of a
baby that’s crying. Then
make the sound that a cat
makes. Are they similar?

“Look! There’s a kitten,” shouted Jasper.
“I can’t see it. Where is it?” said Julia.
“It’s up in the tree,” said Jasper.
“It’s too scared to climb down.”
“Let’s help it get down,” said Julia.

THINK

Baby cats are called kittens.
Now guess what these baby
animals’ parents are: puppies,
chicks, piglets, and lambs.

Catalonia's Human Castles

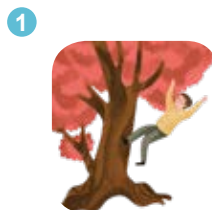

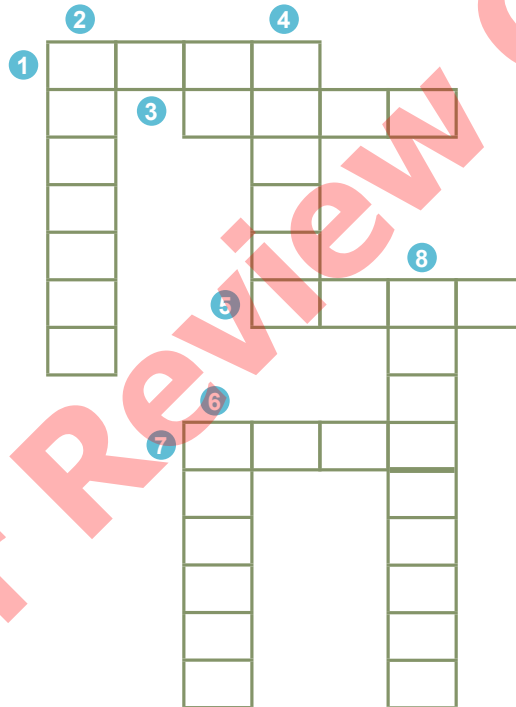

In Spain's north-eastern corner, lies a region famous for its amazing human towers. These are called *castells* or "castles." During cultural festivals, special castle competitions are held.

As many as 70 teams try to build the strongest and highest human towers, by standing on each other's hands and shoulders. There is no age limit for competitors, and the human castles often reach up to 10 levels high!

1. Look and complete the crossword.

Hint: 1 3 5 7 → 2 4 6 8 ↓

Engineering You Can Eat

You will need:

twenty sticks of spaghetti
(not cooked)

91 cm of sticky tape

91 cm of string

one marshmallow

The Marshmallow Challenge is a famous team-building exercise. The challenge is simple. Follow the four rules below and use **only** the materials listed above, and you and your team can build any structure you like!
