CHAPTER 1

WHAT IS AI?

You are at a restaurant.
Instead of a person, a **robot**
greet you! It brings you to your
table. It even brings your food.

robot
server

How does the robot know what to do? It uses **artificial intelligence** (AI)! Robots are controlled by computers. AI lets computers do things humans use knowledge and skills to do. AI even understands language. It can make jobs easier.

AI chatbots are one example. People ask chatbots to do tasks. Like what? A teacher can ask a chatbot to make quiz questions. Now, the teacher doesn't have to. They can spend more time helping their students!

AI helps companies, too. How? If workers use AI, they may be able to get more things done. They do it faster. This makes the company more money.

INTELLIGENCE... RESPONSE

- ☐ Image of a humanist
- ☐ All general medical
- ☐ video of a virtual assistant
- ☐ screenshot of a video game
- ☐ Collaborate with the director
- ☐ Proficiency in operating

CHAPTER 2

AI ON THE JOB

AI does many jobs. Driving is one. Some taxis have AI. They drive by themselves. They pick people up. They follow the rules of the road. They get people where they need to go safely.

AI helps doctors, too. It can look at **MRI** images. AI tells the doctor what it sees. It can find **cancer**.

ACTIVITIES & TOOLS

TRY THIS!

GIVE AI A JOB

What work could AI do? Come up with some new AI jobs with this fun activity!

What You Need:

- paper and pencil or a device for taking notes

- 1 Come up with an idea for a company. What does it do? Does it sell products? Does it provide services for customers? Write down your ideas.
- 2 Think about how your company works. How do customers find you? Do you have a store? Do you have a website? Write down your thoughts.
- 3 What sort of things do your workers do? List everything you can think of.
- 4 Which of these tasks could AI do? Could AI do jobs at your company that human workers can't? Write down your ideas! Share them with a friend or family member.
