Aeroplanes

Aeroplanes are good because:	Aeroplanes are bad because:
They are fast.	They make the air dirty.
They can travel short or long distances.	They are noisy.
They can carry lots of people.	Aeroplane tickets can be expensive.

Some aeroplanes carry only a **pilot**. Other aeroplanes can carry hundreds of passengers. Some aeroplanes carry **goods**.

Most aeroplanes land on the ground, but some land on water. Other aeroplanes can land on small spaces, such as ships.
