Life in the Trees

By Julie Haydon

For Review Only

The Trees

There are some big trees
on my farm.
Lots of animals live in the trees.
I like to watch the animals.

For Review Only

Some of the animals sleep in the daytime.

Dad and I look at them at night with my torch.

Insect

Looks:

This insect looks like a thin stick.
It is brown and has six long legs.

Lives:

The insect lives on the tree branches.
It looks like a branch,
and this helps it to hide
from hungry birds.

For Review Only

Eats:

The insect eats leaves.

Babies:

The insect lays its eggs in the tree, but they fall to the ground. Baby insects come out of the eggs.

stick insect eggs

Spider

Looks:

This spider is brown,
white and red.
It has eight legs.

Lives:

In the daytime,
the spider stays on a leaf.
It makes a web each night
and takes it down in the morning.

For Review Only

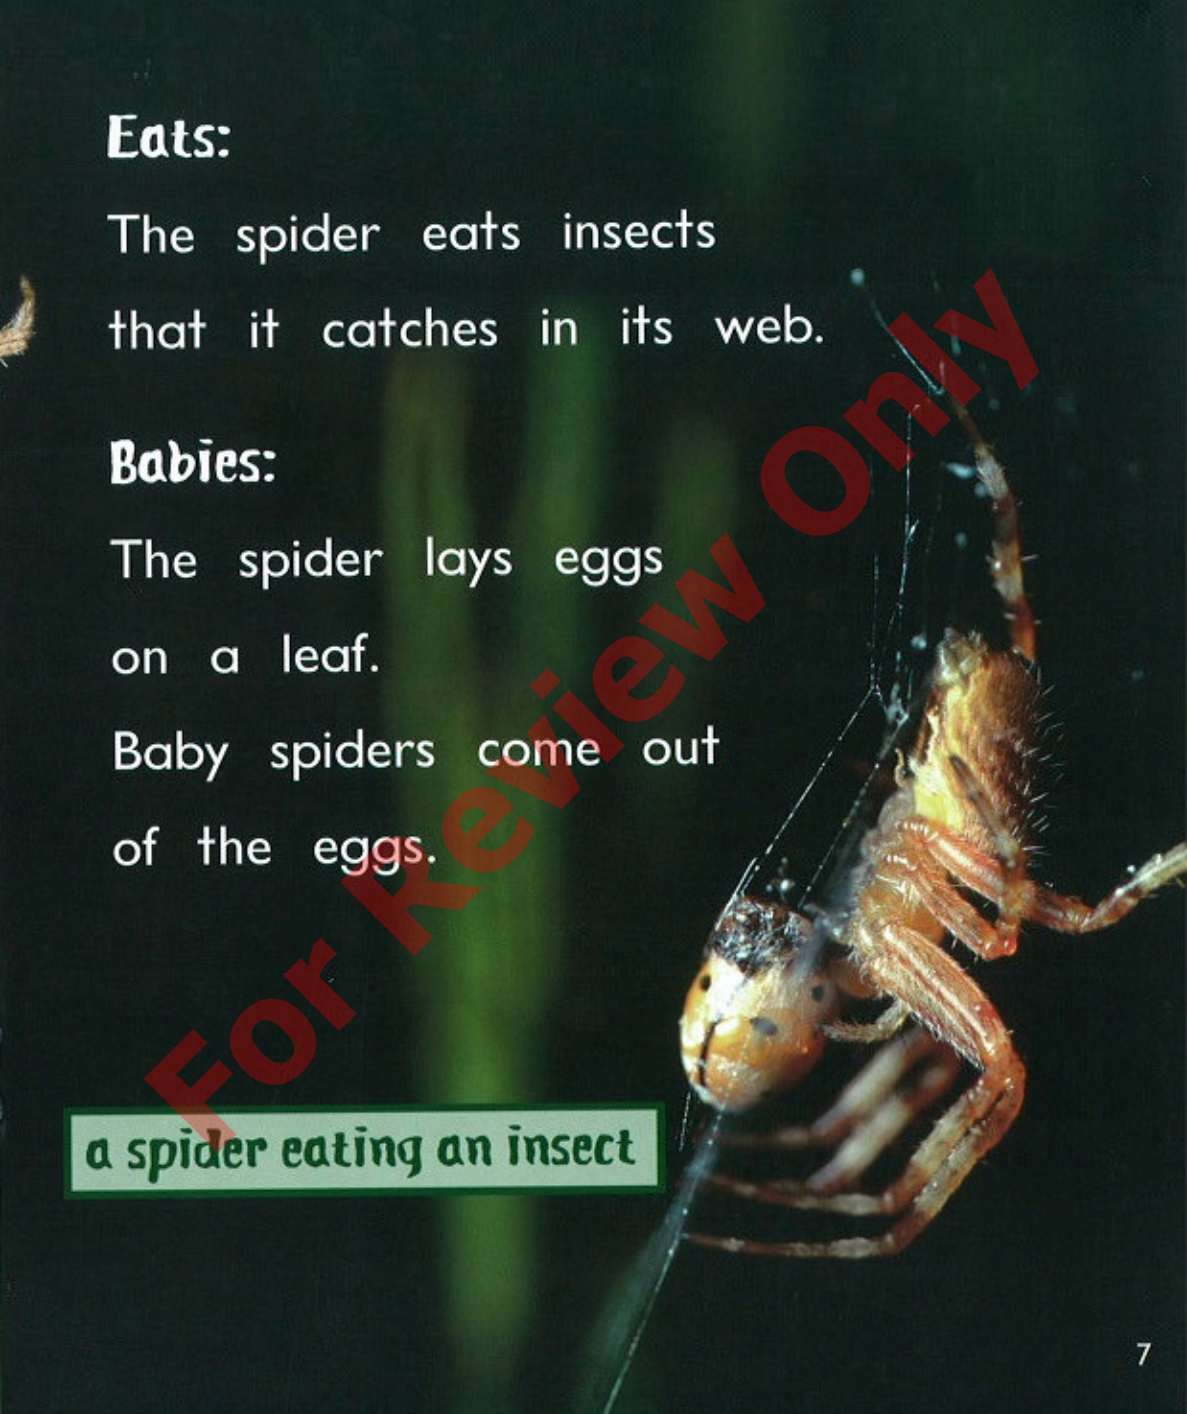

Eats:

The spider eats insects that it catches in its web.

Babies:

The spider lays eggs on a leaf.

Baby spiders come out of the eggs.
