Trees Around Us

We can see trees in lots of places.

There are trees on some streets.

There are trees in parks.

For Review Only

There are trees in gardens.

And there are trees in forests.

There are trees everywhere!

Trees and Leaves

All trees have leaves.

Some trees have big leaves.

Some trees have little leaves.

And some trees have long,

thin leaves, called needles.

For Review Only

All trees need the sun.

The sun shines on their leaves.

This helps the trees to grow.

Growing Leaves

Some trees have leaves all the time.
The leaves grow in summer.
The leaves grow in winter too.

Trees that have leaves all the time are called **evergreen** trees.

For Review Only

Some trees have no leaves in winter. Trees that have no leaves in winter are called **deciduous** trees.

Will these trees grow new leaves in spring? Let's find out!
