New Plants

Look at all of these seeds!

Seeds grow on plants.
Then new plants grow
from the seeds.

For Review Only

Seeds need water.

They need sun and soil too.

New plants will grow from seeds if they have water, sun and soil.

Seeds and the Wind

Some seeds blow away in the wind.

This dandelion has lots of seeds.
The wind blows the seeds away.
New dandelion plants will grow
from the seeds.

Seeds and the Sea

Some seeds can go a long way,
over the sea.
Coconuts are seeds.
They fall from coconut trees,
on to the beach.
The sea takes them
to a new beach.
Then new coconut trees will grow.
