Chapter 1

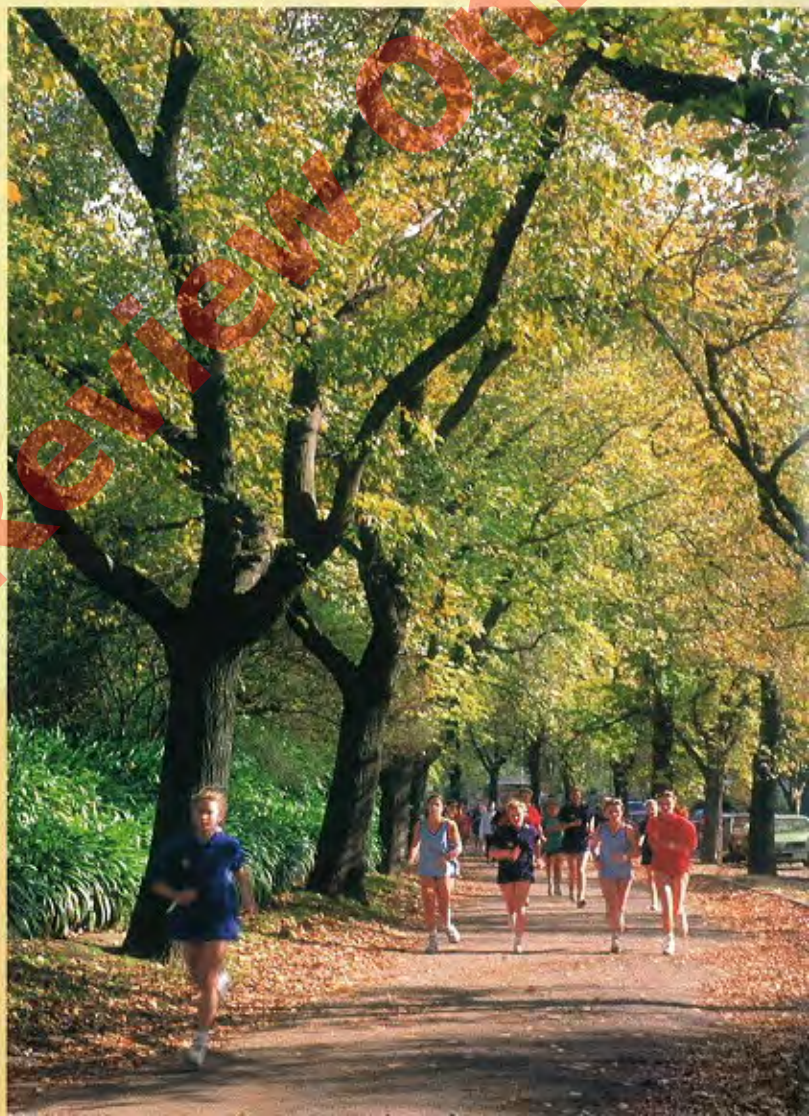

Outdoor Fun

Do you enjoy visiting outdoor places?

You can have a picnic or barbecue in the outdoors.

You can also get lots of exercise and fresh air as you explore your surroundings.

Many interesting facts can also be learned about the plants and animals that live in the places you visit.

For Review Only

Outdoor places are very beautiful.

You can hike among tall trees and see lots of **wildlife** when you visit a forest.

When you visit a beach you can explore rock pools, walk along the sandy shore and watch the waves.

You can sit by a lake or admire the flowers in a park.

Central Park, New York, U.S.A.

This beautiful park is in the middle of a big city.

Chapter 2

Sharing the Environment

Forests, beaches and parks are home to lots of animals. Some animals you may see or hear. Other animals may be very shy.

It is exciting to learn about the animals that live in these places. They are usually different from the animals that live near your home.

gulls

kangaroos

When you visit forests, beaches and parks, you share them with the animals that live there.

It is important to look after these special places, so that they are not damaged by people visiting them. Then the animals will continue to live in them.

Signs at forests, beaches and parks remind you to take care of them.

Chapter 3

In the Forest

Tom and Matt like to visit the forest. While they hike along the forest paths, birds sing from the treetops. They see forest animals running through the trees.

Sometimes, Tom and Matt have a picnic or barbecue in the forest too.

For review only

When Tom and Matt go hiking in the forest, they always keep to the paths. This helps protect the small plants growing under the trees.

Tom and Matt do not make loud noises when they hike through the forest. Then the animals that live in the forest are not **disturbed**.

Never pick plants or their flowers when you visit a forest. Flowers often turn into seeds, which grow into new plants. Many plants are food for forest animals.
