Fish for Dinner

I like to eat fish.

Dad likes to eat fish too.

We have fish for dinner every week.

Trout is our favourite fish.
We went fishing at a trout farm.
Dad helped me catch some trout!

I learned a lot about trout farming
at the trout farm.

Fishy Fact

There are different
kinds of trout.
This trout is called
a rainbow trout.

A Farm for Fish

Dad took me to a big trout farm.
The farm was in the mountains.

There were lots of ponds at the farm.
The ponds were full of rainbow trout.

The trout farm was near a river.

The cold, clean water in the trout ponds came from the river.

Fishy Fact

Trout need very clean water to live and grow.

About Trout

At the trout farm I learned:

Trout live on trout farms and in lakes and rivers.

Some kinds of trout live in the sea too.

Rainbow trout first lived in parts of North America. Then people took their eggs to other countries.

Now rainbow trout are found all around the world.

Fishy Fact

Trout like to eat small insects and other fish or water animals.
