Chapter 1

Fruit

We eat fruit.
Fruit tastes good and it is good for us.

For Preview Only

Fruit grows on plants.
Some fruit grows on trees.
Some fruit grows on vines.
And some fruit grows on other kinds of plants.

For Review only

People can grow fruit in their backyards, but most of the fruit we eat comes from fruit farms.

Fruit Farms

Chapter 2

There are different kinds of fruit farms.
On many fruit farms,
the plants are planted in rows.

fruit trees in rows

For Review Only

Farmers drive big machines
between the rows of plants.
Farmers use the machines
to help them care for the plants.
Machines can be used to help farmers
pick the fruit too.

Healthy Fruit

Chapter 3

Fruit farmers want to grow healthy fruit.
Healthy fruit grows on healthy plants.
Most fruit farmers sell their fruit.
Healthy fruit sells best
because it looks and tastes good.
