Introduction

For teachers' inspection ONLY

There are many parts of the Earth where the land is not flat.
There are mountains, hills and cliffs on the Earth's surface.

Volcanoes are a special kind of mountain.

DID YOU KNOW?

The highest mountain on Earth is Mount Everest.

For teachers' inspection ONLY

Mountains, hills and cliffs
are formed in many different ways.

In the summer and the winter,
mountains can be good places for holidays.

For teachers' inspection ONLY

Mountains

A mountain is land that is much higher than all the other land around it.
In some places,
there is one mountain by itself.

In other places,
there is a line of mountains.

DID YOU KNOW?

A line of mountains is called a range.

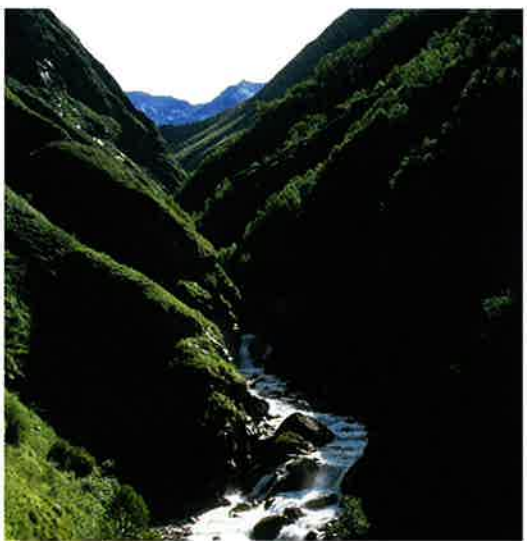

For teachers' inspection ONLY

Some mountains are covered with forests.

Many high mountains are so steep and rocky, that trees cannot grow on them.

There are deep valleys
between some mountains.
Rivers flow down these valleys.

For teachers' inspection ONLY

Mountains have many different shapes.

Some mountains have flat tops.

Other mountains are round on top.

There are many peaks
in some mountain ranges.
